Top of the World Estates
Environment
Agriculture
Encourage local agriculture, and provide community garden space
Provide a mix of high and low technology agriculture areas
Promote integrated Pest Management practices
Encourage appropriate gardening techniques
Promote food storage practices
Gardens are located throughout the community and are anchored by a community operated Farm.
The Farm is operated as a polyculture system that includes orchards, row crops, herbs, and a recirculating aquaculture facility.
At the Farm, demonstrations are given on IPM practices and other appropriate gardening techniques that are utilized at the FArm and encouraged throughout the community, such as No-Till and Terrace gardening.
Community members are enc ouraged to participate in the harvest of the Farm's product. During the harvest, the community is encouraged to participate in a community wide food storage demonstration.
