

Acknowledgements

I would like to thank my advisors: Wendy Jacobson, whose unique insights helped push my thoughts and ideas to a higher level; Patrick Miller, from the beginning for believing and giving me the opportunity to express my ideas and imagination; and Joseph Wang, for his constructive suggestions and criticisms. Also thanks to Ronarit Dhanakoses, from the Fine Arts Department, Thailand for providing me with sources of very useful information, Thanasi Sumpuntarak and Thansit Eksangsi (wherever you are), for helping me gather information from various places.

Finally, special thanks to my family and Nat Punpugdee for their support and encouragement.

Table of Contents

CHAPTER 1: INTRODUCTION.....	1
CHAPTER 2: LITERATURE REVIEW	5
2.1 PERMANENCE OF URBAN STRUCTURAL ELEMENTS	5
2.2 URBAN MORPHOLOGY.....	7
2.3 TYPOLOGY	10
CHAPTER 3: METHODOLOGY.....	16
3.1 MORPHOLOGICAL ANALYSIS	16
3.2 TYPOLOGICAL ANALYSIS.....	17
3.3 CREATION OF GUIDELINES.....	20
CHAPTER 4: FINDINGS	22
4.1 THE EVOLUTION OF THE CANAL SYSTEM IN BANGKOK AND ITS INFLUENCE ON THE SETTLEMENT PATTERN OF THE CITY.....	22
4.2 POTENTIALS AND ISSUES ASSOCIATED WITH PRESERVING AND REESTABLISHING THE CANALS AS PUBLIC SPACES AND AS CONNECTORS OF KEY PUBLIC SPACES	41
4.3 CANAL TYPES.....	47
CHAPTER 5: THE GUIDELINES	64
CHAPTER 6: CONCLUSIONS	85
BIBLIOGRAPHY.....	88
APPENDIX A.....	90
VITA.....	91

List of Figures

Figure 1.1: Map of Thailand and Bangkok showing the location of Rattanakosin Island...	2
Figure 2.1: Conzen's fundamental elements of town plan	9
Figure 2.2: Conzen's Burgage cycle	9
Figure 2.3: Krier's square types	12
Figure 2.4: Examples of American street types from Schumacher	13
Figure 2.5: Types along Main Street	14
Figure 2.6: Example of guidelines for single type	15
Figure 3.1: Diagram showing structural condition	17
Figure 3.2: Diagram showing canal width together with overhead structure	18
Figure 3.3: Diagram showing edge condition	18
Figure 3.4: Diagram showing building setback distance	19
Figure 3.5: Diagram showing adjacent land use	20
Figure 4.1: Eastern bank of the Chao Phraya River prior to 1782	23
Figure 4.2: Canal and street system in the early Bangkok phase, 1782 – 1851	24
Figure 4.3: The influence of the canal system on settlement patterns in the early Bangkok phase, 1782 – 1851	27
Figure 4.4: The use of the canals for commercial purposes or floating markets	28
Figure 4.5: The raised bridge on the Lot Canal built in King Rama V's period	30
Figure 4.6: Canal and street system in the westernization phase, 1851 – 1925	31
Figure 4.7: The influence of the canal system on settlement patterns in the westernization phase, 1851 – 1925	32
Figure 4.8: Existing canal and street system in the contemporary phase, 1925 – present	34
Figure 4.9: The influence of the canal system on settlement patterns in the contemporary phase, 1925 – present	35

Figure 4.10a: Map showing key public spaces on the canals on Rattanakosin Island in the present time	37
Figure 4.10b: Existing fortifications, city gate, and city wall on the canal on Rattanakosin Island	38
Figure 4.10c: Existing temples on the canals on Rattanakosin Island	39
Figure 4.10d: Existing parks and market on the canals on Rattanakosin Island	40
Figure 4.11: Map showing improved areas along the canals on Rattanakosin Island	41
Figure 4.12: The use of the City Moat Canal for transportation purposes	42
Figure 4.13: The north section of the Former City Moat Canal is covered by the bridge and parking lot	44
Figure 4.14: The south section of the City Moat Canal is covered by several iron bridges for commercial purposes	44
Figure 4.15: The Lot Canals are crossed by straight bridges	45
Figure 4.16: Map showing potential to preserve and reestablish the canals as public spaces and connectors of key public spaces on Rattanakosin Island	46
Figure 4.17: Map showing the study area	48
Figure 4.18a: Map showing the locations of the seven canal types	49
Figure 4.18b: Sections showing the seven canal types	50
Figure 4.19: Section and plan of type A	51
Figure 4.20: Section and plan of type B	53
