

SKY ABOVE, EARTH BELOW

DESIGN OF THE SUN SCHOOL FOR ENVIRONMENTAL STUDIES

by

Richard Warren Abrahams

Thesis Submitted to the Faculty of the Virginia Polytechnic
Institute and State University
In partial fulfillment of the requirements for the Degree
of

Master of Architecture

Approved by:

Hunter Pittman, Chairman

Jack Davis

Robert Schubert

James R. Jones

This book is dedicated to our Earth and our Universe,
the source and measure of all well being and beauty.
May they always be an inspiration to me.

Tremendous thanks goes to my wife, Leslie, for her commitment,
love, patience, interest, and continuous support. I also thank my
children, Ben and Josh, for their energy, spirit, and unconditional
love in spite of their loss of my time. They are all my greatest
treasure. A special thanks goes to Heinrich Schnoedt and Mike
O'Brien for encouraging me to view and explore Architecture in a
way I hadn't before. I gratefully acknowledge my colleagues for
sharing their knowledge, and reciprocally, for allowing me to share
my knowledge with them. And, finally, much thanks goes to my
committee for guiding me and keeping me true to my ideas and
vision, through this oh so l-o-o-o-o-o-o-ng but enlightening design
process.
