

ACKNOWLEDGEMENTS

Firstly, I am sincerely grateful to all of my committee members for their guidance and advice rendered during the past two years. My gratitude is extended to Dr. Ernest Hovingh for opening the door of opportunity. I would like to thank Dr. Nammalwar Sriranganathan for his superb expertise in answering all of my bacteriological inquiries. I would like to also thank Dr. François Elvinger for his endless help and advice.

Many thanks go to Dawn Jones and Melanie Mohr for their endless hours spent identifying my bacteria. Thanks to Becky Wade, John Thomason, Amanda Sharp and everyone who helped me with my study. Also thanks go to Terry Lawrence for “whipping up” those posters at the “drop of a hat”.

Thank you to Mary Mainous and the Centers for Molecular Medicine and Infectious Diseases “family” for participating in my study trials and making “the lab” more pleasant.

Special thanks go out to my friends, Sharonda Meade, Jodi Powell and Lenese Colson for their individual encouragements and for making the town of Blacksburg a little more bearable.

My sincere thanks go to the Multicultural (formerly Minority) Academic Opportunities Program (MAOP) “family”, especially to Drs. Randy Grayson and Larry Moore for their support, both financial and moral. I don’t know how I would have gotten this far without MAOP’s support.

I would like to acknowledge GOJO Industries, Inc., Akron, OH for providing financial and gift-in-kind support.

My utmost thanks go to my advisor. Thank you Dr. Pierson for everything. Thank you for your encouragement, willingness to help and fatherly advice on issues far beyond this degree. You will always be the “King of Advisors” to me.

Finally, I wish to thank GOD for blessing me with the strength, willpower and means to survive in this crazy world.
