

LIST OF TABLES

Table 1.1: Characteristics of the regions of peanut production in Senegal	4
Table 1.2: Early growth of peanut exports from Senegal	11
Table 1.3: History of peanut production in Senegal	13
Table 1.4: Assessment of the implementation of the current pricing policy	19
Table 1.5: Technical comparison between La Fleur 11 and 55-437	21
Table 2.1: Comparison of the costs and benefits between the main agricultural commodities in Peru	31
Table 2.2: Effects of agricultural research in the context of different trade policies	35
Table 2.3: Relative importance of the main commodities in the Senegalese peanut sector	53
Table 3.1: Average annual growth of per capita GNP (Gross National Product) in Senegal	77
Table 3.2: Interest rates applied in the money market in Senegal	77
Table 3.3: Exchange rate CFA Franc-US Dollar	78
Table 3.4: Maximum salaries for selected civil servants in Senegal	78
Table 3.5: Production, imports and exports of peanut products in Senegal	79
Table 3.6: Relative importance of the main commodities of the Senegalese peanut market	80
Table 3.7: Unshelled peanut prices on the unofficial market in Senegal	81
Table 3.8: Unshelled peanut official prices in Senegal	82
Table 3.9: Peanut world prices	82
Table 3.10: Production quantities of unshelled peanuts (oil seeds) in Senegal	83
Table 3.11: Number of researchers who participated in the development of La Fleur 11	83
Table 3.12: Seed quantities and prices for peanut varieties 55-437 and La Fleur 11	84
Table 3.13: Average peanut product prices and exchange rate	85
Table 3.14: Average quantity supplied of unshelled peanuts and proportion of each peanut commodity in the total supply of unshelled peanuts in Senegal	85
Table 3.15: Data used for the calculation of the demand growth rate in Senegal	86
Table 3.16: Data used for the calculation of the peanut supply shift in Senegal	89
Table 3.17: Adoption rates in scenarios 1 and 2	91
Table 3.18: Research costs for the development of La Fleur 11	92
Table 3.19: Total research benefits net of research costs for the different evaluations of the baseline scenario	95
Table 3.20: Distribution of total research benefits among consumers, producers and the government for the different evaluations of the baseline scenario	97
Table 3.21: Distribution of the benefits among consumers, producers and the government and among markets in the disaggregated market scenario	100
Table 3.22: IRR for each market of the disaggregated market approach	103
Table 3.23: Estimated annual research costs on La Fleur 11 with a 50 percent increase of researcher salaries	104
Table 3.24: Total research benefits net of research costs for the different evaluations with a 50 percent increase in research salaries (in US\$)	106
Table 3.25: Distribution of total research benefits among consumers, producers and the government for the different evaluations with long-run elasticities	107
Table 3.26: Impact of long-run elasticities on the distribution and size of the benefits in the disaggregated market scenario	110
Table 3.27: Total research benefits net of research costs for the different evaluations with an average exchange rate	112
Table 3.28: Total research benefits net of research costs for the different evaluations with an average discount rate	112
