LIST OF FIGURES

Figure 1.1   AVI Antenna Site Map in San Antonio, Texas .............................................5
Figure 2.1   Layer of S Neurons with R Inputs...............................................................15
Figure 2.2   Multilayer Transig/Purelin Network .........................................................17
Figure 2.3   Backpropagation Learning Schematics .......................................................18
Figure 3.1   Graphical Schematic of San Antonio AVI System Hardware Architecture......24
Figure 3.2   San Antonio Passive Tags .................................................................25
Figure 3.3   Active Tags ......................................................................................26
Figure 4.1   Transportation Network ..................................................................30
Figure 4.2   Graphical Representation of the AVI Readings .........................................31
Figure 4.3a Shortest Path “Covered” by the Readers .................................................32
Figure 4.3b Shortest Path not “Covered by the Readers ............................................32
Figure 4.4   Link Which is Part of a Large Number of Different Paths .......................33
Figure 4.5a Total of 1,000 Readings between One Pair of Nodes ...............................36
Figure 4.5b Total of 500 Readings between 15 Different Pairs of Nodes ....................36
Figure 4.6   A Single-Point Crossover Operator .......................................................39
Figure 4.7   Transportation Network Used for Testing ...............................................40
Figure 4.8   Alternations in the Objective Function Value Depending on the Number
             of Generation ....................................................................................42
Figure 4.9   Alternations in the Total Number of Readings Depending on the Number
             Of Generations ....................................................................................42
Figure 4.10 Changes in the Total Number of Readings and the Total Number
             of “Covered” O-D Pairs as a Function of Weight $W_i$ ..................................43
Figure 4.11 Alternations in the Total Number of Readings Depending on the Number
             Of Readers in the Network ....................................................................44
Figure 5.1   Individual Test Vehicle’s Travel Time vs. 2-, 5-, & 15-min Averages
             ( AVI Site 43->44 on I-35 North) .............................................................54
Figure 5.2   Individual Test Vehicle’s Travel Time vs. 2-, 5-, & 15-min Averages
             ( AVI Site 45->44 on I-35 South) .............................................................54
Figure 5.3   Percent Root Mean Square Error vs. Level of Aggregation .......................55
Figure 5.4   The Location of AVI Site 42, 43, 44 and 45 ............................................56
Figure 5.5  Input-Output Structure of Neural Network Model 1 (NNM1) ..........................57
Figure 5.6  Forecasted Link Travel Time (One-Time-Step Ahead) vs. Observed Link Travel Time ...............................................................59
Figure 5.7  Prediction Results of the Proposed Artificial Neural Network Models ...........61
