

TABLE OF CONTENTS

Acknowledgments	iii
Table of Contents	iv
List of Figures	vii
List of Tables	ix
Chapter 1 Introduction	1
1.1 Introduction	1
1.2 Background of AVI system and San Antonio Projects	4
1.3 Objectives of the Thesis	6
1.4 Thesis Organization	6
Chapter 2 Literature Review	8
2.1 Introduction	8
2.2 Survey of Research in AVI and Other Traffic Surveillance Technologies	8
2.3 Potential Advantages of AVI over Inductance Loop Detection	10
2.4 Potential Advantages of AVI over GPS	11
2.5 The Power of Neural Networks	13
2.5.1 Elements of the Neural Network Paradigm	14
2.5.2 Network Architecture	16
2.5.3 Backpropagation (BP) Algorithm	17
2.6 Summary of Literature Review	19
Chapter 3 AVI Travel Time Data Collection	20
3.1 Introduction	20
3.2 Various Advanced Techniques for Travel Time Data Collection	20
3.2.1 Electronic Distance-Measuring Instruments	21
3.2.2 Electronic License Plate Matching	22
3.2.3 Cellular Phone Tracking	23
3.2.4 Video Imaging	23
3.3 San Antonio Automatic Vehicle Identification (AVI) System	24
3.3.1 Functionality of the San Antonio System	24
3.3.2 San Antonio Passive Tags	25
3.3.3 Communication from Readers to Operating System	26

3.3.4 Estimation of Link Travel Times	27
3.4 System Reliability Study	27
3.5 Summary	28
Chapter 4 AVI Antennas Site Location Optimization	29
4.1 Introduction	29
4.2 Statement of the Problem	30
4.3 Proposed Solution to the Problem	33
4.4 Searching the Best Locations of the Automated vehicle Identification Equipment Using Genetic Algorithms	38
4.5 Numerical Example	40
4.6 Summary	44
Chapter 5 Forecasting Travel Time with Neural Networks	46
5.1 Introduction	46
5.2 Literature Review: Previous Traffic Prediction Efforts	46
5.2.1 Historical, Data-Based Algorithms	47
5.2.2 Time-Series and Kalman Filtering Models	49
5.2.3 Simulation Models	50
5.2.4 Neural Network Models	50
5.3 Data Source and Preliminary Analysis	52
5.4 Neural Network Model Design	56
5.4.1 Input/Output Design	56
5.4.2 Structural Design of Models	58
5.4.3 Neural Network Training	58
5.5 Performance Analysis	60
5.5.1 MAPE Analysis of Proposed Models	60
5.5.2 Comparisons of NNM1 with Other Models	61
5.6 Summary	62
Chapter 6 Conclusions and Recommendations	64
6.1 Summary of the Thesis	64
6.2 AVI Travel Time Data Collection	64
6.3 AVI Antennas Site Location Optimization	64

6.4 Forecasting Freeway Travel Time with A Neural Network	65
6.5 Recommendation for Further Research	65
References	67
Vita	72
