Fair Use Justification

Figure 7 from the article “Optimization of Single-/Multi-/Single-Mode Intrinsic Fabry-Perot Fiber Sensors” by C. Ma, B. Dong, et. al. as found in the *Journal of Lightwave Technology* was used on page 12 of my thesis to reinforce the assertion that I made with regards to selecting the proper cavity length. This use clearly falls under the ‘fair use’ guidelines of copyright law provided by the US Copyright Office found at <http://www.copyright.gov/fls/fl102.html>

Specifically,

- 1) The amount of copyrighted material being used is extremely limited in nature.
- 2) The intended use is non-profit and educational in nature
- 3) Using the figure has no potential to impact the value of the copyright held by the Journal of Lightwave Technology
- 4) Finally, the original source of the material is clearly referenced in the thesis.

For the reasons listed above, my usage of this figure is justified and clearly within the realm of ‘fair use.’

Virginia Tech ETD Fair Use Analysis Results

This is not a replacement for professional legal advice but an effort to assist you in making a sound decision.

Name: Tyler Shillig

Description of item under review for fair use:

Report generated on: 06-15-2012 at : 21:51:46

Based on the information you provided:

Factor 1

Your consideration of the purpose and character of your use of the copyright work weighs: in favor of fair use

Factor 2

Your consideration of the nature of the copyrighted work you used weighs: in favor of fair use

Factor 3

Your consideration of the amount and substantiality of your use of the copyrighted work weighs: in favor of fair use

Factor 4

Your consideration of the effect or potential effect on the market after your use of the copyrighted work weighs: in favor of fair use

Based on the information you provided, your use of the copyrighted work weighs: in favor of fair use
