

## List of Figures

### Chapter 1

Fig. 1.1 Basic Fiber Optic Communication System	8
Fig. 1.2 TDM Configuration for lightwave system	8
Fig. 1.3 Schematic of the wavelength division multiplexing (WDM) architecture	9
Fig. 1.4 Spectrum-Sliced WDM system	10

### Chapter 2

Fig. 2.1 SS-WDM complete system used in calculations	23
Fig. 2.2 Receiver Sensitivity at $Pe=10^{-9}$ for an optical preamplifier receiver as calculated with the Saddlepoint Approximation	24
Fig. 2.3 Receiver Sensitivity at $Pe=10^{-6}$ and $10^{-9}$ for an optical preamplifier receiver as calculated with the Saddlepoint Approximation	25
Fig. 2.4 Receiver Sensitivity at $Pe=10^{-6}$ and $10^{-9}$ for an optical preamplifier receiver as calculated with the Gaussian Approximation	26
Fig. 2.5 Receiver Sensitivity at $Pe=10^{-6}$ for an optical preamplifier receiver as calculated with the Gaussian Approximation and the Saddlepoint Approximation	27
Fig. 2.6 Receiver Sensitivity at $Pe=10^{-9}$ for an optical preamplifier receiver as calculated with the Gaussian Approximation and the Saddlepoint Approximation	28
Fig. 2.7 Optimum $m=B_oT$ evaluated at different error probabilities as calculated with the Saddlepoint Approximation	29
Fig. 2.8 Optimum $m=B_oT$ evaluated at different error probabilities as calculated with the Gaussian Approximation and the Saddlepoint Approximation	30
Fig. 2.9 Minimum receiver sensitivity evaluated at different error probabilities as calculated with the Saddlepoint Approximation	31
Fig. 2.10 Minimum receiver sensitivity evaluated at different error probabilities as calculated with the Gaussian Approximation and the Saddlepoint Approximation	32
Fig. 2.11 Transmission capacity in Gb/s for an SS-WDM system operating at the optimum calculated with the Saddlepoint Approximation.	33

Fig. 2.12 Transmission capacity in Gb/s for an optical preamplifier receiver-based SS-WDM system operating at the optimum calculated with the Saddlepoint and Gaussian Approximations.	34
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

### Chapter 3

Fig. 3.1 Normalized frequency response of Butterworth filter for varying $N$	44
Fig. 3.2 Schematic of a spectrum-sliced system to illustrate the difference between the signal and noise paths.	45
Fig. 3.3 Influence of filter order on Receiver Sensitivity with $Pe=10^{-9}$	46
Fig. 3.4 Influence of filter order on Receiver Sensitivity with $Pe=10^{-6}$	47

### Chapter 4

Fig. 4.1 Illustration of interchannel interference	63
Fig. 4.2 Influence of single-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-6}$ when calculated using the Saddlepoint Approximation	64
Fig. 4.3 Influence of single-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-9}$ when calculated using the Saddlepoint Approximation	65
Fig. 4.4 Influence of double-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-6}$ when calculated using the Saddlepoint Approximation	66
Fig. 4.5 Influence of double-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-9}$ when calculated using the Saddlepoint Approximation	67
Fig. 4.6 Influence of single-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-6}$ when calculated using the Gaussian Approximation	68
Fig. 4.7 Influence of single-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-9}$ when calculated using the Gaussian Approximation	69
Fig. 4.8 Influence of double-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-6}$ when calculated using the Gaussian Approximation	70
Fig. 4.9 Influence of double-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-9}$ when calculated using the Gaussian Approximation	71
Fig. 4.10 Influence of single-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-6}$ when calculated using the Chi-Square Approximation	72

Fig. 4.11 Influence of single-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-9}$ when calculated using the Chi-Square Approximation	73
Fig. 4.12 Influence of double-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-6}$ when calculated using the Chi-Square Approximation	74
Fig. 4.13 Influence of double-sided interchannel interference on $Np$ and $m$ for $Pe=10^{-9}$ when calculated using the Chi-Square Approximation	75
Fig. 4.14 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on $Np$ and $m$ for $Pe=10^{-6}$ when single-sided interchannel interference is considered	76
Fig. 4.15 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on $Np$ and $m$ for $Pe=10^{-9}$ when single-sided interchannel interference is considered	77
Fig. 4.16 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on Average Receiver Sensitivity for $Pe=10^{-6}$ when double-sided interchannel interference is considered.	78
Fig. 4.17 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on $m=B_0T$ for $Pe=10^{-6}$ when double-sided interchannel interference is considered.	79
Fig. 4.18 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on Average Receiver Sensitivity for $Pe=10^{-9}$ when double-sided interchannel interference is considered.	80
Fig. 4.19 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on $m=B_0T$ for $Pe=10^{-9}$ when double-sided interchannel interference is considered.	81
Fig. 4.20 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on system throughput for $Pe=10^{-6}$ when double-sided interchannel interference is considered.	82
Fig. 4.21 Comparison between Saddlepoint, Gaussian, and Chi-Square Approximation regarding influence of channel overlap on system throughput for $Pe=10^{-9}$ when double-sided interchannel interference is considered.	83

## **Appendix A**

Fig. A.1 Arbitrary function with a saddlepoint 91

## **Appendix B**

Fig. B.1 Chi-square pdf for 1 degree of freedom 97

Fig. B.2 Chi-square pdf for 2 degrees of freedom 98

Fig. B.3 Chi-square pdf for 4 degrees of freedom 99

Fig. B.4 Chi-square pdf for 8 degrees of freedom 100
