

Acknowledgements

Dedicated to my wonderful parents, John and Diane Zalewski, sister, Amy Zalewski, and my wonderful wife, Katherine for supporting me through my college years.

Personally, I would like to thank Dr. David Chalmers for serving as my major professor and helping me through my graduate school experience. I truly appreciated all the time and advice you gave me throughout my time at Virginia Tech. Thanks also for taking me on as a new graduate student who knew very little about turfgrass just that I loved golf. Finally, thanks for treating me with respect and being a friend throughout my experiences.

I would like to thank Dr. Gregory Evanylo and Dr. Raymond Reneau for serving on my committee. I appreciated your guidance, support and willingness to take time to discuss my research. Again, thank you for treating me with respect and timely advice throughout my graduate studies.

Thank you to “Dickie” Sheppard, Charlie McCoy, David McKissack, and the Virginia Tech Turfgrass Research Center staff. I appreciated the constant help, advice, and support while conducting my research on the research center grounds.

It was a pleasure to work with Dr. David Parrish and his senior seminar class helping him in anyway I could for my Graduate Assistantship. Dr. Parrish, thank you for the professional advice, time you took speaking with me, and overall friendliness. You really are a wonderful teacher/advisor. Thank you to Dr. Jack Hall and his Turfgrass Usage classes. It was such a learning experience to help run the labs and grade tests, quizzes etc. Not coming from a turfgrass background it gave me an opportunity to learn

a lot about the field and industry. Most importantly, Dr. Hall, working with you and the students allowed me the opportunity to strengthen my own communication skills. I too appreciated your patience with me as I was learning more about turf each day.

Thank you to the entire CSES Department at Virginia Tech. All of the faculty and staff that I worked with, took classes from, and met throughout my graduate studies were wonderful people and a real pleasure to know.

Thank you to Matthew Wharton for acting as a second advisor to me. Thanks for taking the time to teach me what you know about turf and helping me throughout my graduate studies. I wish I knew half as much about turfgrass as you! I'd also like to thank Caroline Porter for always laughing with me in numerous classes and being such a great friend throughout the years. I hope all is well with you.

Finally, I would like to thank my family, John, Diane, and Amy Zalewski and my wonderful wife, Katherine. Thanks for supporting me during my studies and urging me on. Mom and Dad, you are wonderful parents and wonderful friends. Amy, I could not ask for a better sister and friend. And Katherine, my wife, if I wrote down everything I ever wanted in a wife and best friend I would not have believed I could meet someone better! All of your continued support and urging after moving to Vermont is deeply appreciated. Thanks for making me finish this thing. It's about time! Remember, it's o.k. to stress just not to stress out. To all of you, thanks for always being there for me.
