

ACKNOWLEDGEMENTS

I wish to thank my family for all their support and encouragement all the way. My mother has been a pillar of strength to me and if it was not for her, I would be nothing.

I would like to thank my fiancé, Mr. Amol J. Khanapurkar, for his unconditional love. He always stood by me and motivated me to become a better individual. I owe him everything.

I am truly grateful to Dr. Cao, my academic brother, for his guidance in the lab. He always assured me that everything has a solution if you believe.

I wish to express my thanks to my committee members, Dr. Carlier, for believing in me and teaching me that nothing is impossible, not even organic chemistry, and Dr. Brewer, whose guidance and advice is greatly appreciated. I would be lost in the USA without her.

Finally, I thank my advisor, my academic father, Dr. Kingston for helping me to understand my goals and teaching me to achieve them. I thank you for being so concerned about me and molding me into the researcher I always wanted to be.
