

Microphysiometry Studies of Rapid Binding of Insulin-Like Growth Factor I by Parental and Transfected Mammary Epithelial Cell Lines

Rose Marie Robinson

Thesis submitted to the Faculty of the
Virginia Polytechnic Institute and State University
in partial fulfillment of the requirements for the degree of

Master of Science
in
Chemical Engineering

Kimberly E. Forsten, chair
R. Michael Akers
Richey M. Davis

October 16, 1998
Blacksburg, Virginia

Keywords: MAC-T, SV40-IGF-I, Insulin-like Growth Factor I (IGF-I), Insulin-like Growth Factor II (IGF-II)
