Acknowledgements

First of all, I would like to thank Dr. Anbo Wang for bringing me to the Center for Photonics Technology and accepting me as one of your graduate research assistants. I consider myself very lucky and privileged to work in such a state-of-art research center. I would also like to thank you for showing such confidence in my abilities and encouraging me to perform to the best of my capabilities. You have seen me grow academically and personally and I thank you for all of the wonderful advice that has shaped me into the professional I am today.

I would also like to thank Dr.Gary Pickrell and Dr.Yilu Liu for agreeing to be on my defense committee. Thank you for the many fruitful discussions and for the valuable guidance and support during the preparation of this thesis.

To the members of the CPT staff, I would like to extend my sincere gratitude. Thank you to Dr. Kristie Cooper. Without you, this document and my success as a research assistant would not have been possible. Also, to Ms. Debbie Collins and Mr. Bill Cockey, thank you for all of the administrative support as well as personal advice.

I also owe a lot of thanks to the students of the CPT for your help and cooperation. I really enjoyed the discussions with you which intrigue my inspiration and push me to discover my potential. I am especially grateful to Yizheng Zhu and Juncheng Xu for your knowledge and patience, who led me to the research on the miniature sensors.

This work was supported by US Department of Energy (DOE) under contract DE-FC36-01GO11050. I would like to thank Dr. Wing Ng, Aditya Ringshia and Hugh Hill of the Dept. of Mechanical Engineering of Virginia Tech for providing the engine test facilities and technical support, and Dr. Bo Song for many helpful discussions. Also, I appreciate the technical assistance of Frank Caldwell.

Personally, I would like to thank my family for their never ending encouragement, love, and support throughout my life. Thank you for always being there and for being so understanding. You are my inspiration and my joy.

Table of Contents

Title Page.....i
Abstract.....ii
Acknowledgements.....iii
Table of Contents.....iv
List of Illustrations.....vi
List of Tables.....viii

Chapter 1 Introduction..... 1
1.1 Need for Miniature Pressure Sensors.....2
1.1.1 Medical Applications.....2
1.1.2 Industrial Applications.....2
1.2 Miniaturized Sensing Technology.....2
1.2.1 MEMS Sensors.....3
1.2.2 Fiber Optic Sensors..... 4
1.3 Organization of the Thesis..... 6

Chapter 2 Sensor Design and System Structure..... 8
2.1 Fabry-Pérot Interferometer Theory..... 8
2.1.1 Geometry Ray Analysis.....9
2.1.2 Fringe Patterns.....12
2.1.3 Two-Beam Model.....14
2.2 Principles of Diaphragm-based Pressure Sensors..... 16
2.2.1 Theory of Diaphragm Based Pressure Sensors.....16
2.2.2 Sensor Coefficient Design.....18
2.2.3 Material Selection.....21
2.3 Signal Processing and System Introduction.....22
2.3.1 CTS.....22
2.3.2 White Light System.....23

Chapter 3 Sensor Fabrication……24
3.1 Sensor Structure……24
3.2 Fabrication Process……26
3.2.1 Cavity Fabrication……26
3.2.2 Diaphragm Fabrication……27
3.3 Fabrication Tools……29
3.3.1 Coefficient Setup of the Splicer……30
3.3.2 Wet-Etching……31

Chapter 4 Laboratory Test Result……33
4.1 Static Pressure Test……33
4.1.1 Testing System Setup……33
4.1.2 Algorithm……34
4.1.3 Performance……37
4.1.4 Loss Analysis……43
4.2 Dynamic Pressure Test……47
4.2.1 Testing System Setup……47
4.2.2 Frequency Response……48
4.3 Dynamic Pressure Calibration……49

Chapter 5 Engine Field Test Result……50
5.1 Installation Location in the Engine……50
5.2 Package Description……51
5.3 Performance Analysis……52
5.3.1 Acoustic Pressure Measurement Result……54
5.3.2 Time Delay Analysis……55
5.4 Summary……55

Chapter 6 Conclusions and Future Work……56
6.1 Conclusions……56
6.2 Future Work……56
6.2.1 Cleaver Adjustment……57
6.2.2 Other Materials and Structures……57
6.2.3 Other Bonding Methods……57
6.2.4 Film Deposit……58
6.2.5 Three Cavity Problem……58
6.2.6 Multimode Fiber Sensors……58
6.2.7 Open Cavity Structure……58
6.2.8 Dynamic Pressure Calibration……59
6.2.9 Other Issues……59

References……61

Vita……63
