

List of Figures

1.1 Design space relationship among SAND, CNA and DBO	4
2.1 Flow Chart for Procedures of Displacement Based Optimization	15
3.1 3-Bar Truss	24
3.2 Weight Iterative History Of 3-Bar Truss	26
3.3 6-Bar Truss	28
3.4 Objective Iterative History Of 6-Bar Truss	30
3.5 10-Bar Truss	33
3.6 Objective history of 10-bar with elastic-perfectly-plastic material	38
3.7 Stress-Strain Curves: Elastic-Perfectly-Plastic v.s. Ramberg-Osgood	40
3.8 10-bar objective history with Bi-linear and Ramberg-Osgood material	41
3.9a 128-Bar double-layer space truss	44
3.9b X-Y view of 128-Bar truss	44
3.9c X-Z view and loading of 128-Bar truss	45
3.10 128-bar objective history for nonlinear case	46
3.11a Optimal topology of 128-Bar truss linear case	48
3.11b X-Y topological view of 128-Bar truss linear case	48
3.12a Optimal topology of 128-Bar truss nonlinear case	49
3.12b X-Y topological view of 128-Bar truss nonlinear case	49
