

Acknowledgements

There are so many people to thank for helping me during the last year and a half. So many have made my short stay in Southwestern Virginia a lot easier than I thought it was going to be. I will try to cover all the bases without being my usual long winded self.

First, I would like to thank **Dr. John C. Duke** for his guidance, encouragement, and patience over the last year and a half. Thank you so much for forcing me, sometimes kicking and screaming, to look at research and my work in different ways and for opening my mind. Your support was essential to my success here.

I would like to thank **Dr. Lesko** and **Dr. Weyers** for serving on my committee and taking time to talk with me on many occasions.

I would also like to thank Dr. Lesko and **Dr. Cousins** for providing indispensable advice, information, and support on different aspects of my project and for their cooperation in a difficult field assignment.

Dr. Weyers, your class was probably the most useful class I've ever taken and I don't think I'll even realize how much it helped me until I start my job. Last semester I always looked forward to Tuesday evenings of learning and hanging out.

Mike Horne, your help in every aspect of my research was imperative to my completion of this degree. If you were not here I'd probably still be trying to turn the camera on...of course you'd still be looking for your keys and other assorted items. Don't worry, I'll draw a map before I leave. Your support, guidance and friendship were vital to me keeping what little sanity I came here with. Thank you so much for always being there when I needed you. You'll make a great professor some day...as soon as you finish your dissertation!

Much of my experimental work would have not have been completed without the assistance of **Danny Reed** and **Dr. Loos** in the composite fabrication laboratory (without whom there would be no "mini deck"), **Dave Simmons**, **Mac McCord**, **Brett Farmer**, **Dennis Huffman**.

The assistance, cooperation, and experience of my fellow graduate students were essential for the completion of the field work as well as the model deck. I'd like to thank **Jason Coleman**, **Tony Temeles** and **Dave Haeberle** for all of their time and help.

Of course, I would like to thank the members of my department, **Materials Science and Engineering** Department. The faculty, staff, and students really made my stay in Blacksburg one I'll always remember (when will I ever get the chance to go to a pig roast again?!?!). A special thank you to **Dr. Kander** for the

use of his In Focus machine all the time and for all of his time spent talking to me first semester. Also, I would be remiss if I failed to mention the important groups of people that really gave me the full Southwestern Virginia experience, namely **Anders' Angels, Tech Tailgaters**, and the inhabitants of **125 Holden Hall**. Lastly, there are three people in the MSE department who I would be lost without - **Doug Crowson, Anders DiBiccari, and Martha McCann**. Doug, thank you so much for everything, the laughs and the bruises, you really made my last few months here ones I'll always remember. Anders, I'm starting to think we were actually separated at birth. Thanks for the tennis, the music and always be laid back enough to balance me out. Martha, I just didn't think that there were any other fun people who came out of Hopkins! Your presence here was essential to my success every step of the way in my professional and personal life. Thank you for being a great friend.

Furthermore, there were many people that I met during my brief period here who impacted my life with so many fun experiences. **Jacque Burks**, my Kenny Rogers buddy, I'll certainly never forget that! **Amy Dalrymple, Rich Meyerson, John Ryan, Jolyn Senne**, thanks so much for taking me in when I first got here and showing me a good time. **Robin Davis** and **Dave Mokarem**, you guys really made my summer so much fun, thank you for all the laughs and for taking care of me so well. **Emmett O'Brien**, thank you for your professionalism. **Vincenza Italiano**, thank you for being my NJ connection, my Italian kindred spirit, my transportation to home, and my friend. **Kate Hays**, thank you for so much for so many years.

Mike Neubert, I of course have to thank you for your crisis management skills, where would I be without your sanity? Thank you so much for your love and support, I'm so glad we met here and have made it through the many six-hour car trips.

Lastly, without the love, support, guidance, and understanding of my parents, **Larry and Fran Miceli**, I would be completely lost. You've been with me through so much in the last five years and never fail to amaze me with your innate knowledge of how to do everything just right. I'm so glad I'm moving back to NJ and I never thought I'd say that! Also, I must thank my guardian angel **Paul Miceli** and **God** who have kept me out of harms way for so many years and provided me with the peace of mind necessary to overcome so many obstacles.
