

LIST OF TABLES

Table 3.1 Corrections to SPT (after Youd, et al., 2001).....	53
Table 3.2 Magnitude scaling factors (after Youd, et al., 2001).....	54
Table 5.1 Summary of parameters used in FLAC analyses	89
Table 6.1 Analyses using FLAC	122
Table 6.2 Mesh generation used for each case	123
Table 6.3 Soil parameters used in comparing SHAKE91 and FLAC analyses.....	124
Table 6.4 Results of comparison study between SHAKE91 and FLAC analyses	125
Table 6.5 The effects of varying moduli with depth	126
Table 6.6 The effects of no aggregate pier (Loma Prieta earthquake)	127
Table 6.7 The effects of no aggregate pier (Saguenay earthquake)	127
Table 6.8 The effects of aggregate pier (Loma Prieta earthquake)	128
Table 6.9 The effects of aggregate pier (Saguenay earthquake)	128
Table 6.10 The effects of soil stratification (Loma Prieta earthquake).....	129
Table 6.11 The effects of soil stratification (Saguenay earthquake).....	129
Table 6.12 The effects of soil properties (Loma Prieta earthquake).....	130
Table 6.13 The effects of soil properties (Saguenay earthquake).....	130
Table 6.14 The effects of pore pressure generation (Loma Prieta earthquake).....	131
Table 6.15 The effects of pore pressure generation (Saguenay earthquake).....	131
Table 6.16 Values of ground acceleration from FLAC analyses	132
Table 6.17 Values of r_u – peak (Loma Prieta earthquake)	133
Table 6.18 Values of r_u – steady state (Loma Prieta earthquake).....	133
Table 6.19 Values of r_u – peak (Saguenay earthquake).....	134
Table 6.20 Values of r_u – steady state (Saguenay earthquake).....	134
Table 6.21 Calculation of factor of safety against liquefaction (FS_L) for Case 1C2.....	135
Table 6.22 Increase in lateral stress.....	136
Table 7.1 Frequency at which peak ground acceleration occurs (Loma Prieta earthquake)	222
Table 7.2 Frequency at which peak ground acceleration occurs (Saguenay earthquake)	222
Table 7.3 Comparison of r_u values (steady state) between Seed-Idriss (1971) and Marcuson-Hynes-Franklin (1990) and FLAC.....	223
Table A.1 Typical values of unit weights (after Coduto, 2001).....	269
Table A.2 Typical values of void ratio (after Das, 1994).....	270
Table A.3 Estimation of friction angle of granular soils from SPT test results (after Peck, et. al., 1974)	271
Table A.4 Values of elastic modulus and Poisson’s ratio (after FLAC, 2000).....	272
Table A.5 Typical values of elastic modulus and Poisson’s ratio (after Das, 1994).....	273
Table A.6 Typical values for dilation angle (after FLAC, 2000).....	274
Table A.7 Typical values of permeability (after Duncan, 2001).....	275
Table A.8 Typical values of $(N_1)_{60}$ for cohesive soil (after Das, 1994)	276
Table A.9 Typical values of strength properties (after FLAC, 2000)	277
