

ACKNOWLEDGMENTS

Special thanks go to my major advisor, Dr. Denise Brochetti, for her patience, understanding, guidance, and most of all the encouragement she has given me during my graduate studies. I would also like to thank committee members Dr. Susan E. Duncan and Dr. William E. Barbeau for their advice, encouragement and support.

I would like to thank Carolyn Harris, Department of Human Nutrition, Foods and Exercise, for her technical guidance, patience and extra hours she put in throughout the study. I would also like to thank Dr. Klaus Hinkelmann and Dr. Peter Ammerman for their assistance with the statistical analyses.

I would like to thank Dairy Management Inc., Chicago, IL, for funding for the project. Special thanks go to all the sensory panelists for their participation in this study and to Tracy Sutton for her assistance with the sensory testing.

Very special thanks go to my parents, Zhuo-Rong Wu and Jing-Xian Hou, for their love, understanding and financial support during my graduate studies in the U.S. I would also like to thank my friends, Maria Uyrio, Maryam Majadi, Kimberley Hart, Alice Zhou and Quinn Zuo, for their love, advice and encouragement during my graduate studies.

TABLE OF CONTENTS

CHAPTER		PAGE
I.	INTRODUCTION.....	1
II.	REVIEW OF LITERATURE.....	4
	1. Lactose Intolerance.....	4
	2. Lactose-Reduced Milk.....	6
	3. Baked Custard.....	7
	4. Low Fat, Low Cholesterol Egg Yolk as an Egg Substitute.....	7
	5. Nutrition and the Elderly.....	9
III.	EXPERIMENT I: QUALITY OF A DESSERT TYPE LACTOSE- REDUCED BAKED CUSTARD	
	1. Introduction.....	13
	2. Materials and Methods.....	13
	Baked Custard Formulations and Preparation.....	13
	Chemical Analyses.....	15
	Physical Analyses.....	16
	Sensory Evaluation: Descriptive Analysis.....	16
	Experimental Design and Statistical Analyses.....	18
	Sensory Evaluation: Consumer Testing.....	20
	3. Results and Discussion.....	21
	Composition.....	21
	Physical Properties.....	23
	Sensory Characteristics.....	29
	Acceptability.....	31
	4. Conclusions.....	35
IV.	EXPERIMENT II: QUALITY OF AN ENTREE TYPE LACTOSE- REDUCED BAKED CUSTARD	
	1. Introduction.....	36
	2. Material and Methods.....	36
	Baked Custard Formulations and Preparation.....	36
	Chemical Analyses.....	36
	Physical Analyses.....	36
	Sensory Evaluation: Descriptive Analysis.....	38
	Experimental Design and Statistical Analyses.....	38
	3. Results and Discussion.....	38
	Composition.....	38
	Physical Properties.....	44
	Sensory Characteristics.....	49

CHAPTER	PAGE
4. Conclusions.....	53
LIST OF REFERENCES.....	55
APPENDIXES.....	59
A. SPECIFICATIONS FOR DRIED EGG WHITE SOLIDS.....	60
B. EFFECTS OF GUMS ON THE QUALITY OF LACTOSE- REDUCED BAKED CUSTARD MADE WITH LOW-FAT, LOW-CHOLESTEROL EGG YOLK SOLIDS.....	62
C. CONSENT FORMS USED IN DESCRIPTIVE ANALYSIS AND CONSUMER TESTING.....	66
D. INSTRUCTION SHEET AND SCORECARD USED IN DESCRIPTIVE ANALYSIS OF THE DESSERT TYPE BAKED CUSTARDS.....	73
E. SCORECARD USED IN CONSUMER TESTING OF THE DESSERT TYPE BAKED CUSTARD.....	76
F. TABLES OF INTERACTION MEANS FOR THE DESSERT TYPE BAKED CUSTARDS (EXPERIMENT I).....	79
G. SPECIFICATIONS FOR DRIED CHEDDAR CHEESE FLAVOR POWDER.....	84
H. INSTRUCTION SHEET AND SCORECARD USED IN DESCRIPTIVE ANALYSIS OF THE ENTREE TYPE BAKED CUSTARDS.....	86
I. TABLES OF INTERACTION MEANS FOR THE ENTREE TYPE BAKED CUSTARDS (EXPERIMENT II).....	89
VITA.....	93

LIST OF TABLES

TABLE	PAGE
1-Recommended Dietary Allowance for persons ages 51 and older for protein, calcium, phosphorus and vitamin D.....	10
2-Formulations for dessert type baked custards.....	14
3-Sensory terminology and reference standards for dessert type baked custards.....	17
4-Formulations for dessert type baked custard used in training of sensory panelists.....	19
5-Means \pm standard deviations for nutrient composition of dessert type baked custard mixes.....	22
6-Means \pm standard deviations for physical properties of dessert type baked custards.....	26
7-Means \pm standard deviations for sensory characteristics of dessert type baked custards.....	30
8-Characteristics of young and elderly adults participating in consumer testing.....	33
9-Formulations for entree type baked custards.....	37
10-Sensory terminology and reference standards for entree type baked custards.....	39
11-Means \pm standard deviations for nutrient composition of entree type baked custard mixes.....	43
12-Means \pm standard deviations for physical properties of entree type baked custards.....	46
13-Means \pm standard deviations for sensory characteristics of entree type baked custards.....	52
14-Means \pm standard deviations for color, gel strength, and syneresis of baked custards evaluated in preliminary testing.....	65
15-Interaction means \pm standard deviations for nutrient composition of dessert type baked custard mixes.....	80
16-Interaction means \pm standard deviations for physical properties of dessert type baked custards.....	81
17-Interaction means \pm standard deviations for sensory characteristics of dessert type baked custards.....	83
18-Interaction means \pm standard deviations for hedonic ratings of the dessert type baked custards.....	83
19-Interaction means \pm standard deviations for nutrient composition of entree type baked custard mixes.....	90

TABLE	PAGE
20-Interaction means \pm standard deviations for physical properties of entree type baked custards.....	91
21-Interaction means \pm standard deviations for sensory characteristics of entree type baked custards.....	92

LIST OF FIGURES

FIGURE	PAGE
1-Interaction between type of milk and type of egg for Hunter "L" values for top surface of dessert type baked custards.....	25
2-Interaction between type of milk and type of egg for Hunter "L" values for bottom surface of dessert type baked custards.....	27
3-Interaction between type of milk and type of egg for Hunter "b" values for bottom surface of dessert type baked custards.....	28
4-Interaction between type of milk and type of egg for graininess of dessert type baked custards.....	32
5-Interaction between type of milk and type of egg for lactose concentrations of entree type baked custard mixes.....	40
6-Interaction between type of milk and type of egg for galactose concentrations of entree type baked custard mixes.....	42
7-Interaction between type of milk and type of egg for Hunter "L" values for top surface of entree type baked custards.....	45
8-Interaction between type of milk and type of egg for Hunter "a" values for top surface of entree type baked custards.....	47
9-Interaction between type of milk and type of egg for Hunter "a" values for bottom surface of entree type baked custards.....	48
10-Interaction between type of milk and type of egg for Hunter "b" values for bottom surface of entree type baked custards.....	50
11-Interaction between type of milk and type of egg for gel strength of entree type baked custards.....	51
