

Acknowledgements

I wish to express my gratitude to Dr. Michael Leib for his guidance and support as my major professor. His enthusiasm and insight were invaluable in the completion of this project.

I wish to thank Dr. Phil Sponenberg for his teaching and his time in helping me perform the histopathology review.

I wish to thank Dr. Lorin Warnick for his time and patience in helping me with the statistical analysis.

I wish to thank Dr. Dru Forrester and Dr. William Chickering for their support and editing.

Sincere appreciation is extended to Dr. Spencer Johnston for allowing me to use random-source dogs from the junior surgery laboratory and to John Strauss and Shelley Threlkeld for facilitating my time in the laboratory. I wish to thank Meagan Irby, Rachel Bethard, and Arthur Cennamo for their excellent technical help in working with these dogs.

Finally, I wish to thank Ms. Carolyn Sink for her time in helping me understand the logistics of the BSP assay.
