

Acknowledgments

I would like to express my sincere appreciation to my advisor, Dr. Fred C. Lee for his guidance, encouragement and continuous support through the course of this work. The extensive knowledge, vision, and creative thinking of Dr. Lee have been the source of inspiration for me throughout this work.

I would like to thank my master committee members, Dr. D. Chen for helping me develop the graduate background in magnetic and EMI design, Dr. J. Lai for his help and encouragement.

I am especially indebted to the members of Delta Power Electronics Lab for their support over the year. I am very grateful to Dr. Milan M. Jovanović. Many detailed and in-depth discussions with him have invaluable shaped the course of this work. I would like to thank Dr. Laszlo Huber for his constant help in single-stage PFC techniques and hardware work. Also thanks to Dr. Yungtaek Jang and Dr. Yuri V. Panov for their help.

I must thank all the members of the excellent VPEC group, including the faculties, staffs and students. The friendship, enlightening discussions, and the overall atmosphere center spirit have made my stay at VPEC pleasant and enjoyable. Special thanks to our PFC group, Qun Zhao, Fengfeng Tao, Alex Uan-zo-li and Dr. Jinrong Qian for the very helpful exchanges of thoughts and experiences. Also thanks to Dr. Guichao Hua, Dr. Xingzhu Zhang, Mr. Xunwei Zhou, Dr. Kunrong Wang, Mr. Kun Xing, Dr. Hengchun Mao, Mr. Richard Zhang, Mrs. Qiong Li, and Dr. Wei Chen for helping me to get start in VPEC. Also thanks to all my friends in VPEC, I will be happy to continue my study here with all of you in the coming years.

Finally, this work is dedicated to my dear parents, Tieqiao Zhang and Huiming Chen, for their love and encouragement during the past years.

This work is supported under Delta Fellowship, provided by Delta Electronic Ind. Co. Ltd. Taiwan.
