

## Acknowledgments

I would like to thank my parents, Shirley and Patricia Dalton, for their love and support. Without their help this degree would not have been possible.

I want to thank the subjects and students volunteers who gave so much of their time. I thank Roxanne Polo and John Rockwell for the mornings they spent in the laboratory. I especially want to thank Janet Wojcik. Her assistance and advice was a tremendous help.

I would like to thank my committee members for their encouragement and support. Thanks to Dr. Ken Webb for his suggestions regarding the schedule of data collection. Thanks to Dr. Don Sebolt for his help with my statistical analysis. I thank Dr. Janet Walberg Rankin for being a great advisor. I have immensely enjoyed working with someone I admire so much.

For this research project, I received partial funding from the Gatorade Sports Science Institute. The formula diet used in this study was donated by Ross Laboratories. I thank both of these companies for their support.
