Authors' Rights

### **Copyright**

Intellectual property, in particular, copyright (rights in editorial content), trademarks (rights in brands for services or journals), and database rights (rights in compilations of information), form the foundation of Elsevier's publishing services and communications businesses. Elsevier embraces the opportunities the digital environment offers for communication and access, while at the same time recognizing the new risks that this environment poses: the ease with which unauthorized copies can be made and distributed worldwide.

- the right to make copies (print or electronic) of the journal article for your own personal use, including for your own classroom teaching use;

- the right to present the journal article at a meeting or conference and to distribute copies of such paper or article to the delegates attending the meeting;

- for your employer, if the journal article is a ‘work for hire’, made within the scope of the author’s employment, the right to use all or part of the information in (any version of) the journal article for other intra-company use (e.g. training);
- o patent and trademark rights and rights to any process or procedure described in the journal article;
- o the right to include the journal article, in full or in part, in a thesis or dissertation;
