Dear Sir or Madame,

Chapters two and three of my dissertation have been published as peer reviewed manuscripts. Chapter two was published by the *Geological Society of London*. I have included my email correspondence with Angharad Hills, the staff editor, regarding the use of this publication as a chapter in my dissertation. I am also including the copyright information from the *Journal of Structural Geology* in which Chapter three was published. On the second page of this document, in the *Retention of Rights for Scholarly Purposes* section, it specifically states that this includes personal use. On page three *personal use* is defined and includes the use of this material as part of my dissertation.

Please contact me for any additional materials.

Best regards,
Micah J. Jessup

Dear Micah

The Society has no objection to you using your paper in this way.

Best wishes
Angharad

Greetings Angharad,

I am finishing up my dissertation and have included this manuscript as one of my chapters. Although it is an entirely different format, Virginia Tech requires that I receive permission from the publisher for this. The "notes" section of my copyright assignment form states that I should contact you. Please let me know how I should proceed.

Many thanks,
Micah Jessup

THE PUBLISHING AGREEMENT

Assignment of publishing rights

I hereby assign to Elsevier Ltd the copyright in the manuscript identified above (government authors not electing to transfer agree to assign a non-exclusive licence) and any supplemental tables, illustrations or other information submitted therewith that are intended for publication as part of or as a supplement to the manuscript (the "Article") in all forms and media (whether now known or hereafter developed), throughout the world, in all languages, for the full term of copyright, effective when and if the article is accepted for publication. This transfer includes the right to provide the Article in electronic and online forms and systems.

Retention of Rights for Scholarly Purposes (see Definitions below)

I understand that I retain or am hereby granted (without the need to obtain further permission) rights to use certain versions of the Article for certain scholarly purposes, as described and defined below ("Retained Rights"), and that no rights in patents, trademarks or other intellectual property rights are transferred to the journal.

The Retained Rights include the right to use the Pre-print or Accepted Authors Manuscript for Personal Use, Internal Institutional Use and for Scholarly Posting; and the Published Journal Article for Personal Use and Internal Institutional Use.

Author Warranties/Ethics and Disclosure

I affirm the Author Warranties noted below, and confirm that I have reviewed and complied with the relevant Instructions to Authors, the Ethics in Publishing policy, and Conflicts of Interest disclosure. For further information see the journal home page or elsevier.com.

Author warranties

- The article I have submitted to the journal for review is original, has been written by the stated authors and has not been published elsewhere.
- The article is not currently being considered for publication by any other journal and will not be submitted for such review while under review by this journal.
- The article contains no libellous or other unlawful statements and does not contain any materials that violate any personal or proprietary rights of any other person or entity.
- I have obtained written permission from copyright owners for any excerpts from copyrighted works that are included and have credited the sources in my article.
- If the article was prepared jointly with other authors, I have informed the co-author(s) of the terms of this publishing agreement and that I am signing on their behalf as their agent, and I am authorized to do so.

Funding agency requirements and other policies

I have also been made aware of the journal's policies with respect to funding agency requirements such as the NIH 'PublicAccess' policy, and the rapid publication 'ArticlesInPress' service. See elsevier.com for details.

DEFINITIONS

Accepted Authors Manuscript ("AAM")

Author's version of the manuscript of a paper that has been accepted for publication and which may include any author-incorporated changes suggested through the peer review process. AAMs should not include however other publisher value added contributions such as formatting and pagination, and should include the Appropriate Bibliographic Citation and a link to the final publication (generally through the relevant DOI).

Appropriate Bibliographic Citation

Authors posting Accepted Authors Manuscript online may later add a citation for the Published Journal Article indicating that the paper was subsequently published, and may mention the journal title provided they add the following text at the beginning of the document:

"NOTICE: this is the author's version of a work that was accepted for publication in Journal of Structural Geology. Changes resulting from the publishing process, such as peer review, editing, corrections, structural formatting, and other quality control mechanisms may not be reflected in this document. Changes may have been made to this work since it was submitted for publication. A definitive version was subsequently published in PUBLICATION, [VOL#, ISSUE#, (DATE)] DOI#"

Commercial Purposes

The use or posting of articles for commercial gain including the posting by companies or their employee-authored works for use by customers of such companies (e.g. pharmaceutical companies and physician-prescribers); commercial exploitation such as directly associating advertising with such postings; the charging of fees for document delivery or access; or the systematic distribution to others via e-mail lists or list servers (to parties other than known colleagues), whether for a fee or for free.

Internal Institutional Use

Use by the author's institution for classroom teaching at the institution (including distribution of copies, paper or electronic, and use in coursepacks and courseware programs) and posting on secure Intranet sites for scholarly purposes.

Personal Use

Use by an author in the author's classroom teaching (including distribution of copies, paper or electronic), distribution of copies to research colleagues for their personal use, use in a subsequent compilation of the author's works, inclusion in a thesis or dissertation, preparation of other derivative works such as extending the article to book-length form, or otherwise using or re-using portions or excerpts in other works (with full acknowledgment of the original publication of the article).

Pre-print

Author's own write-up of research results and analysis that has not been refereed, nor had any other value added to it by a publisher (such as formatting, copy editing, and the like).

Published Journal Article ("PJA")

The definitive final record of published research that appears or will appear in the journal and embodies all value-adding publisher activities including formatting and pagination.

Scholarly Posting

Postings on open Web sites operated by the author or the author's institution for scholarly purposes, or (in connection with Pre-prints) pre-print servers, provided there is no Commercial Purpose involved. Deposit in or posting to Special Subject Repositories (such as PubMed Central) is permitted only under specific agreements between Elsevier and the repository and only consistent with Elsevier's policies concerning such repositories. If the author wishes to refer to the journal in connection with such posting, the Appropriate Bibliographic Citation should be used.

Special Subject Repositories

Certain repositories such as PubMed Central ("PMC") are authorized under special arrangement with Elsevier to process and post certain articles such as those funded by the National Institutes of Health under its Public Access policy (see elsevier.com for more detail on our policy).

Articles accepted for publication in an Elsevier journal from authors who have indicated that the underlying research reported in their articles was supported by an NIH grant will be sent by Elsevier to PMC for public access posting 12 months after final publication. The version of the article provided by Elsevier will include peer-review comments incorporated by the author into the article. Because the NIH 'Public Access' policy is voluntary, authors may elect **not** to deposit such articles in PMC. If you wish to 'opt out' and not deposit to PMC, you may indicate this by sending an e-mail to NIHauthorrequest@elsevier.com.
