

Practical Analysis Tools for Structures Subjected to Flow-Induced and Non-Stationary Random Loads

Karen Mary Louise Scott

Dissertation submitted to the Faculty of the
Virginia Polytechnic Institute and State University
in partial fulfillment of the requirements for the degree of

Doctor of Philosophy

in

Aerospace Engineering

Rakesh K. Kapania, Chair

Mayuresh J. Patil

Michael K. Philen

Joseph A. Schetz

June 20, 2011

Blacksburg, Virginia

Keywords: Flow-induced vibration, random vibration, non-stationary forcing,

Karhunen-Loeve expansion, polynomial chaos

Copyright 2011, Karen M. L. Scott

Virginia Tech ETD Fair Use Analysis Results

This is not a replacement for professional legal advice but an effort to assist you in making a sound decision.

Name: Karen Scott

Description of item under review for fair use: Figure 2.1: Variation in drag coefficient with Reynolds number, showing differing flow regimes Farell, C., "Flow around fixed circular cylinders: Fluctuating loads," Journal of Engineering Mechanics, Vol. 109, 1981, pp. 1153.

Report generated on: 06-22-2011 at : 12:43:55

Based on the information you provided:

Factor 1

Your consideration of the purpose and character of your use of the copyright work weighs: *in favor of fair use*

Factor 2

Your consideration of the nature of the copyrighted work you used weighs: *in favor of fair use*

Factor 3

Your consideration of the amount and substantiality of your use of the copyrighted work weighs: *in favor of fair use*

Factor 4

Your consideration of the effect or potential effect on the market after your use of the copyrighted work weighs: *in favor of fair use*

Based on the information you provided, your use of the copyrighted work weighs: *in favor of fair use*
