“The impression becomes inescapable that in Kahn, as once with [Frank Lloyd Wright], architecture began anew.”

“With Kahn, ... the germinal project was cross-axial in plan. This was the Bath House for the Trenton Community Center...[W]here Wright interwove the axes,...Kahn keeps each of his four spaces uncompromised by giving it a separate roof cap, with occults, of its own. Kahn’s (hipped roofs) do not project in Wright’s overhang, keeping instead to their contained volumes,...supported by massive piers. Wright’s piers are solid, Kahn’s hollow.” —Vincent Scully, Jr. Louis I. Kahn, p25.

“Today we must build with hollow stones,’...to house the services,...’The nature of space is further characterized by the minor spaces that serve it. Storage rooms, service rooms and cubicles must not be partitioned areas of a single space structure, they must be given their own structure.”

“Order does not imply beauty.” —Louis I. Kahn, from Vincent Scully, Jr. Louis I. Kahn, p25, 26

"Nature does not make Art. She works by circumstance and law. Only man makes Art. Because man chooses. He invents. He can make the doors smaller than people and skies black in the daytime if he wants to. He assembles. He can bring together the mountain, the serpent and the child."

"Space is architectural when the evidence of how it is made is seen and comprehended."

"I believe firmly that we will become even more attuned to qualities that exist in the spaces, that 'want to be' - qualities that transcend function and circumstance."

"In a dormitory I’m doing for Bryn Mawr College, I had a feeling that the dining room, living room, reception rooms and entrance were different, in every respect, from the sleeping quarters. And I kept the sleeping quarters apart from these rooms, believing that I was expressing that one was different from another. But I discovered my mistake. I realized that a person sleeping in a room felt well about his house if he knew the dining room was downstairs. The same way with the entrance to the building. The sense of hospitality, or reception, of getting together must be part of the fabric of the house itself. I changed, much to my delight, the whole conception, and I made these spaces part of the fabric of the other spaces. To me, this is realization in form." —Louis I. Kahn. from Alessandra Latour, ed. *Louis I. Kahn: Writings, Lectures, Interviews*. p150-151.
"The Kimbell Art Museum by Louis Kahn is also a disciplined, coherent, and visually clear statement, but here the aesthetics derive from the more classically oriented sensibility of its architect. It has an austere yet rich simplicity that comes from the repetition of a vault-like form, given a dull sheen from its lead-covered exterior, and a beautifully articulated concrete structural frame with in fill paneled walls of travertine. Its classic sense of timelessness is ennobled by a reverence for material and detail. Its interior form, bathed in a diffused natural light that enters the space via continuous interior suspended screen and reflected downward off the curve of the vault."

"Louis Kahn’s Kimbell Art museum in Fort Worth is a masterpiece in this respect. A survey of the numerous studies of the building demonstrate a care for ‘fit’ that can only be compared to the perfection of the classics, especially the Greek classics. Kahn put the use of tools and machines to the ultimate architectonic end; with them he produced buildings that were composites of parts working in total harmony among themselves and with the whole. There is no Kahn building that does not give evidence of his genius in the use of materials. He has achieved perfection in buildings with all sorts of budgetary constraints, from the most modest to the monumental."

The church of Eliel Saarinen that I visited on the Chicago trip in Fall 1997. The space inside of this building changes ways of my study in term of lighting in architecture.

Selected Bibliography

Acknowledgment

Those who have influenced my study are gratefully acknowledged:
Thanks to Rengin Holt for your kindness taught for all of simplicity thought.
Thanks to Bill Brown, Bill Galloway, and Heiner Schnödt for knowledge and for making me more understanding in architecture.
Thanks to all of my friends, families, and my sponsor. They all gave me their best wishes and forced me to study abroad.
Vita

Pornphut SUPPA-AIM

Bachelor of Architecture
Silpakorn University
Bangkok, Thailand
February, 1989.

Master of Architecture
Virginia Polytechnic Institute and State University
Blacksburg, VA
January, 1999
