Fair Use Evaluation

Name: Craig Alan English Jr.

Figures under fair use: Figures 1.2 and 1.3. Source: Chris Martin, Steve LePera, and Uri Vandsburger. A concept for simultaneous high-frequency actuation of liquid spray characteristics. 48th AIAA Aerospace Sciences Meet-ing, (AIAA-2010-611), 2010.

Factor 1: Purpose and Character of Use

In Favor of Fair Use: This is a thesis or research paper for a non-profit university. It is a continuation of the source's original work.

Factor 2: Nature of the Copyrighted Work

In Favor of Fair Use: The images are from a published conference proceeding dealing with factual information.

Factor 3: Amount and Substantiality

Not in Favor of Fair Use: The portions and ideas used are central to the referenced work.

In Favor of Fair Use: The amount used is appropriate for the educational background required for the rest of the thesis.

Factor 4: Effect

In Favor of Fair Use: The referenced document was lawfully acquired. The market is actually improved for the original paper by the continuation of this research.

After a thorough evaluation of the previous four factors, it is clear that the images meet the requirements for fair use.
