

Dedicated to my father

Timothy R. Lease

1950-1988

ACKNOWLEDGEMENTS

I must first thank our Heavenly Father for all of the blessings in my life. The opportunities for education and the peace that I was able to keep throughout these past years could not have come from another source. I am also very grateful for my mother and my family who have encouraged and supported me in all that I've done. I have never been in lack for someone to celebrate with in times of happiness and grieve with in times of sadness. Most of all, I want to convey my deepest love for my future wife, Melissa. My life would be vacant without her inspiration, her encouragement, and her love.

I am also grateful to Dr. Sam Easterling, my advisor and chairperson, who helped me throughout my research and writing. I would also like to thank the other members of my committee, Dr. Thomas Murray and Dr. Kamal Rojiani for their participation in my project. Other individuals whose contributions towards my research were greatly appreciated are Brett Farmer, Dennis Huffman, and all the others who assisted me with my work.

Table of Contents

	Page
Abstract	ii
Acknowledgements	iv
Table of Contents	v
List of Figures	vii
List of Tables	viii

1. Introduction

1.1. General	1
1.2. Current Specifications	1
1.3. Development of Specifications	2
1.4. Review of Past Research	4
1.5. Objective	7

2. Elemental Tests

2.1. Overview	9
2.2. Coupon Tests	9
2.3. Gap and Screw Measurements	11
2.4. Shear Test Details	12
2.4.1. Test Specimen Configuration	12
2.4.2. Test Designation	14
2.5. Shear Test Results	15
2.6. Tension Test Details	16
2.6.1. Test Specimen Configuration	16
2.6.2. Test Designation	17
2.7. Tension Test Results	18
2.8. Summary	18
2.9. Limitations	18

3. Diaphragm Tests

3.1. Overview	20
3.2. Test Details	20
3.2.1. Test Designation	20
3.2.2. Test Frame Configuration	20
3.2.3. Test Specimen Configuration	23
3.2.4. Loading and Measurements	25
3.2.5. Coupon Tests	27

3.3.	Test Results	28
3.4.	Summary	32
3.5.	Limitations	32

4. Data Analysis and Comparison to Proposed Models

4.1.	Overview	33
4.2.	Elemental Tests	33
4.2.1.	Shear Tests	33
4.2.1.1.	Data Analysis	33
4.2.1.2.	Proposed Modifications	36
4.2.1.3.	Resistance Factor Analysis	38
4.2.2.	Tension Tests	40
4.3.	Diaphragm Tests	42
4.3.1.	Diaphragm Shear Strength Calculations.....	42
4.3.1.1.	Outline of MCA Procedure	42
4.3.1.2.	Connection Strength	46
4.3.1.3.	Example Calculations	48
4.3.2.	Comparison of Calculated Strength to Observed Strength	51
4.4.	Summary	52

5. Conclusions and Recommendations

5.1.	Conclusions	54
5.2.	Recommendations	55
