

## **VITA**

Michael Allan Stafne completed his Bachelor of Science degree in mechanical engineering at Tennessee Tech in 1991. Subsequently, he began his professional career at a military research center located near Washington, D.C. Employed as a mechanical project engineer by the United States Army Communications-Electronics Command Research, Development and Engineering Center, he performed both structural and thermal analysis and design work. He voluntarily resigned his position in 1995 to pursue his graduate education at Virginia Tech. While attending graduate school, he completed a European internship in Zürich with a Swiss aerospace and defense firm, Oerlikon-Contraves AG, and obtained his Professional Engineer license.
