Demo

Repository Page

Featured Page

Featured

The Featured page pops up on your main home screen and includes pictures from all users. A repository is a group of images with a single, or a select number of contributors.
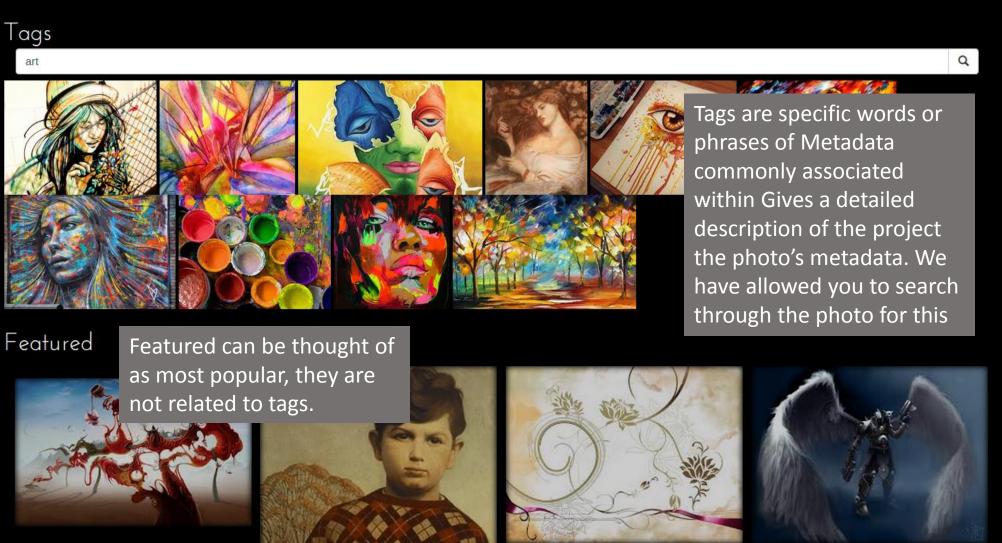

Tag Functionality

Tags are specific words or phrases of Metadata commonly associated within Gives a detailed description of the project the photo's metadata. We have allowed you to search through the photo for this

Featured can be thought of as most popular, they are not related to tags.

Comment Management System

This is beautiful! Keep up the good work!

dsin Appreciate the support!

Lessons Learned

- Define a strict API early!
- Establish an Agile process (or close to it)
- Communication!!!
- Define the idea before coding
- Test code before pushing to master branch (GitHub)
- Don't be afraid to create new branches (GitHub)
- Think carefully before considering database options

Where to Next?
(next items to be implemented)

- Finish developing Patron use case
- Implement collaboration between users
  - Patron ↔ Artist
- Implement commerce functionality
- Implement music management
- Finish implementing music management
