

**Creep and Shrinkage Effects
on Steel-Concrete Composite Beams**

Seunghwan Kim

Thesis submitted to the faculty of
the Virginia Polytechnic Institute and State University
in partial fulfillment of the requirements for the degree of

Master of Science
In
Civil Engineering

Roberto T. Leon, Chair
Carin L. Roberts-Wollmann
Zachary Grasley

May 1st, 2014
Blacksburg, Virginia

Keywords: Creep and Shrinkage, Steel-Concrete Composite Beams,
Time-dependent Behaviors, Long-term Deflections

Draft 09/01/2009

Virginia Tech ETD Fair Use Analysis Results

This is not a replacement for professional legal advice but an effort to assist you in making a sound decision.

Name: Seunghwan Kim

Description of item under review for fair use: Figure 3.1 Creep strain with time, Mindess and Young, Concrete, McGraw-Hill, 1981, p.23; Figure 3.2 Drying shrinkage of concrete, Mindess and Young, Concrete, McGraw-Hill, 1981, p.34; Figure 3.9 Cyclic relative humidity (RH=90<->40%), Muller and Pristl, Creep and shrinkage of concrete at variable ambient conditions, Rilem Proceedings, Champan&Hall, 1993, p.45; Figure 3.10 Development of shrinkage strain in concrete specimens with diameter of 50mm at variable (RH=90<->40%) and constant (RH=65%) ambient humidity, Muller and Pristl, Creep and shrinkage of concrete at variable ambient conditions, Rilem Proceedings, Champan&Hall, 1993, p.56; Figure 4.1 Gradually reducing stress history, Gilbert and Ranzi, Time-dependent behavior of concrete structures, Spon, 2011, p.59; Figure 4.6 (a) Slip of a composite beam, (b) Strain distribution with slip, Wang, Deflection of steel-concrete composite beams with partial shear interaction, Journal of Structural Engineering, 1998, p.70; Figure 4.14 Test set up (a) elevation, (b) cross-section, (c) stud, Bradford and Gilbert, Time-dependent behavior of simply-supported steel-concrete composite beams, Magazine of Concrete Research, 1991, p.87; Figure 5.3 Calculation of shrinkage effects, AISC, The 13th edition of AISC Steel Construction Manual, 2005, p.104; Table 3.1 Combination of loading, restraining, and humidity conditions, Metha and Monterio, Concrete, McGraw-Hill, 2006, p.36

Based on the information you provided:

Factor 1

Your consideration of the purpose and character of your use of the copyright work weighs: *in favor of fair use*

Factor 2

Your consideration of the nature of the copyrighted work you used weighs: *in favor of fair use*

Factor 3

Your consideration of the amount and substantiality of your use of the copyrighted work weighs: *in favor of fair use*

Factor 4

Your consideration of the effect or potential effect on the market after your use of the copyrighted work weighs: *in favor of fair use*

Based on the information you provided, your use of the copyrighted work weighs: *in favor of fair use*
