Author Rights
  what they are
  what you want to keep
  what you may be signing away

Life Science Journals & Author Rights

Your Work & Open Access

Your Data & Open Access
Open Access = Global Access
Your Copyrights

Reproduce the work
Distribute the work
Publicly Perform the work
Publicly Display the work
Create Derivative works
Scholarly / Creative Works

Scholarly works
no income to scholar expected

Creative works
provide income to the creator
What rights do you want to keep...

for yourself?

to allow others?
What rights do you sign over to publishers?
Life Science Journals & Author Rights

plant disease

Editor-in-Chief: Mark L. Gleason
Published by The American Phytopathological Society

Current All Issues First Look Pre 1997

and to edit letters for clarity and conciseness.

Open access. All content of Plant Disease is open access without restriction 12 months after publication. Immediate open access can be purchased for any article for a fee of $2,400. The fee is reduced to $1,900 if at least one author’s institution has an online subscription.
Electronic Posting of Articles. The Plant Cell will review manuscripts that include data that are posted on an author's website. If the data are posted in the form of a preprint, it should be clearly stated beneath the title of the web preprint that it is under review (or accepted for publication) by The Plant Cell. Authors may post only the version of their manuscript that is under consideration by The Plant Cell editorial board. Final published manuscripts will reside on the journal sites. Once the published article has appeared online at the journal site, a toll-free link providing barrier-free access to the HTML and PDF versions of the article will be e-mailed to all authors. Authors should replace their manuscript posting with the toll-free link to their article. These links also may be deposited in institutional repositories. (Back to top)

NIH Public Access Policy. On behalf of authors, The Plant Cell deposits final published articles in PubMed Central for release 12 months after the date of publication. If a paper was funded in whole or in part by the National Institutes of Health, this fulfills the requirements of the NIH Public Access Policy. However, authors of NIH-funded papers, if they choose, may deposit the peer-reviewed, accepted version of their manuscript in PubMed Central, provided the release date is set for 12 months after the date of final publication in the journal. Life Science Journals & Author Rights

BioMed Central license agreement

In submitting an article to any of the journals published by BioMed Central I certify that:

1. I am authorized by my co-authors to enter into these arrangements.

2. I warrant, on behalf of myself and my co-authors, that:
   a. the article is original, has not been formally published in any other peer-reviewed journal, is not under consideration by any other journal and does not infringe any existing copyright or any other third party rights;
   b. I am/we are the sole author(s) of the article and have full authority to enter into this agreement and in granting rights to BioMed Central are not in breach of any other obligation.
   c. the article contains nothing that is unlawful, libellous, or which would, if published, constitute a breach of contract or of confidence or of commitment given to secrecy;
   d. I/we have taken due care to ensure the integrity of the article. To my/our - and currently accepted scientific - knowledge all statements contained in it purporting to be facts are true and any formula or instruction contained in the article will not, if followed accurately, cause any injury, illness or damage to the user.
   e. I agree to BioMed Central’s Open Data policy.

3. I, and all authors, agree that the article, if editorially accepted for publication, shall be licensed under the Creative Commons Attribution License 4.0. If the law requires that the article be published in the public domain, I/we will notify BioMed Central at the time of submission upon which the article shall be released under the Creative Commons 1.0 Public Domain Dedication waiver. For the avoidance of doubt it is stated that sections 1 and 2 of this license agreement shall apply and prevail regardless of whether the article is published under Creative Commons Attribution License 4.0 or the Creative Commons 1.0 Public Domain Dedication waiver.
ETD Policies in Life Science Journals

Pre-print servers and author/institutional repositories

Posting a manuscript on a pre-print server such as ArXiv, BioRxiv, Peer J Preprints or similar platforms (both commercial and non-commercial) is not considered to be duplicate publication. BioMed Central will also consider peer reviewing manuscripts that have been posted on an author's personal or institutional website. Material that has formed part of an academic thesis and been placed in the public domain, as per the awarding institution's guidelines, will also be considered by BioMed Central's journals.

BioMed Central also encourages self-archiving by authors of manuscripts accepted for publication in its journals.

discounts available to authors

Many open access journals use a business model of charging authors of published articles. Institutional memberships and library subscriptions can offer discounts to authors.

About Scientific Data

Scientific Data is an open-access, peer-reviewed publication for descriptions of scientifically valuable datasets. Our primary article-type, the Data Descriptor, is designed to make your data more discoverable, interpretable and reusable.

Licence agreement and author copyright

Scientific Data does not require authors of Data Descriptors to assign copyright of their published contributions. Authors can select one of two open access Creative Commons licences: Attribution 4.0 International or Attribution-NonCommercial 4.0 International. Please see here for more information on the available licences and our article processing charges.
