

A Framework for Understanding Heterogeneous Differentiation of CD4⁺ T Cells

Tian Hong

Dissertation submitted to the faculty of the Virginia Polytechnic Institute
and State University in partial fulfillment of the requirements for the degree of

Doctor of Philosophy

In

Genetics, Bioinformatics and Computational Biology

John J. Tyson, Chair

Liwu Li

T. M. Murali

Jianhua Xing

Lijuan Yuan

July 10, 2013

Blacksburg, VA

Keywords: CD4⁺ T cells, mathematical model, cell differentiation

Copyright 2013, Tian Hong

CHAPTER 2

A Mathematical Model for the Reciprocal Differentiation of T Helper 17 Cells and Induced Regulatory T cells

A research article published in PLoS Computational Biology in 2011 (2011, 7:e1002122).

All articles published in BMC Systems Biology are open access, which means the articles are universally and freely available online. In addition, the authors retain copyright of their article, and grant any third party the right to use reproduce and disseminate the article, subject to the terms of our copyright and license agreement. Allowing the authors to retain copyright of their work permits wider distribution of their work on the condition it is correctly attributed to the authors.
