Introduction This text is all original material.

**Synthetic Biology Open Language (SBOL) Version 1.1.0** RFCs are available under a Creative Commons Attribution No-Derivatives license. See following correspondence on page iii.

**A Step-by-Step Introduction to Rule-Based Design of Synthetic Genetic Constructs Using GenoCAD** This chapter is a reproduction of a published article, reproduced with the permission of the publisher. See following permission on page iv.

**Development of a domain-specific genetic language to design* Chlamydomonas reinhardtii* expression vectors** This text is all original material.

**Modeling Structure-Function Relationships in Synthetic DNA Sequences using Attribute Grammars** This chapter is a reproduction of an article published under an open access license, so no permissions needed from publisher. However, permission from the primary author of the work was obtained. See following authorization on page v.

**Design of Languages for Systems and Synthetic Biology to Translate Genetic Designs into Mathematical Models** This text is all original material.

**Strengths and limitations of the federal guidance on synthetic DNA** This chapter is a reproduction of an article published, and here is reused with the permission of NPG. See following authorization on page vi.

**Conclusion** This text is all original material.
Hi Laura,

Thanks for checking.

You don't need to formally ask for permission since...

(1) the RFC authors assign copyright to the BBF so that...

(2) the BBF can then make all RFCs available under a Creative Commons Attribution No-Derivatives license.

This allows everyone to freely reuse / republish RFCs exactly as they were submitted, just be referencing them as RFCs, and without needing to ask for permission.

E.g., http://dspace.mit.edu/handle/1721.1/73909 (see the bottom of the page associated with your RFC).

I realize that the above may not be obvious, so deep thanks for your question. I’ll have to add this to a FAQ somewhere.

Best wishes,

Drew
## ELSEVIER LICENSE TERMS AND CONDITIONS

Aug 23, 2013

This is a License Agreement between laura adam ("You") and Elsevier ("Elsevier") provided by Copyright Clearance Center ("CCC"). The license consists of your order details, the terms and conditions provided by Elsevier, and the payment terms and conditions.

All payments must be made in full to CCC. For payment instructions, please see information listed at the bottom of this form.

Author Request

If you are the author of this content (or his/her designated agent) please read the following. If you are not the author of this content, please click the Back button and select an alternative Requestor Type to obtain a quick price or to place an order.

Ownership of copyright in the article remains with the Authors, and provided that, when reproducing the Contribution or extracts from it, the Authors acknowledge first and reference publication in the Journal, the Authors retain the following non-exclusive rights:

a) To reproduce the Contribution in whole or in part in any printed volume (book or thesis) of which they are the author(s).

b) They and any academic institution where they work at the time may reproduce the Contribution for the purpose of course teaching.

c) To reuse figures or tables created by them and contained in the Contribution in other works created by them.

d) To post a copy of the Contribution as accepted for publication after peer review (in Word or Text format) on the Author’s own web site, or the Author’s institutional repository, or the Author’s funding body’s archive, six months after publication of the printed or online edition of the Journal, provided that they also link to the Journal article on NPG’s web site (e.g. through the DOI).

NPG encourages the self-archiving of the accepted version of your manuscript in your funding agency’s or institution’s repository, six months after publication. This policy complements the recently announced policies of the US National Institutes of Health, Wellcome Trust and other research funding bodies around the world. NPG recognises the efforts of funding bodies to increase access to the research they fund, and we strongly encourage authors to participate in such efforts.

Authors wishing to use the published version of their article for promotional use or on a web site must request in the normal way.

If you require further assistance please read NPG’s online author reuse guidelines.

For full paper portion: Authors of original research papers published by NPG are encouraged to submit the author’s version of the accepted, peer-reviewed manuscript to their relevant funding body’s archive, for release six months after publication. In addition, authors are encouraged to archive their version of the manuscript in their institution’s repositories (as well as their personal Web sites), also six months after original publication.
