

ASM Journals Statement of Authors' Rights

Authors may post their articles to their institutional repositories

ASM grants authors the right to post their accepted manuscripts in publicly accessible electronic repositories maintained by funding agencies, as well as appropriate institutional or subject-based open repositories established by a government or non-commercial entity. Since ASM makes the final, typeset articles from its primary-research journals available free of charge on the ASM Journals and PMC websites 6 months after final publication, ASM recommends that when submitting the accepted manuscript to PMC or institutional repositories, the author specify that the posting release date for the manuscript be no earlier than 6 months after the final publication of the typeset article by ASM.

Authors may post their articles in full on personal or employer websites

ASM grants the author the right to post his/her article (after publication by ASM) on the author's personal or university-hosted website, but not on any corporate, government, or similar website, without ASM's prior permission, provided that proper credit is given to the original ASM publication.

Authors may make copies of their articles in full

Corresponding authors are entitled to 10 free downloads of their papers. Additionally, all authors may make up to 99 copies of his/her own work for personal or professional use (including teaching packs that are distributed free of charge within your own institution). For orders of 100 or more copies, you should seek ASM's permission or purchase access through Highwire's Pay-Per-View option, available on the ASM online journal sites.

Authors may republish/adapt portions of their articles

ASM also grants the authors the right to republish discrete portions of his/her article in any other publication (including print, CD-ROM, and other electronic formats) of which he or she is author or editor, provided that proper credit is given to the original ASM publication. "Proper credit" means either the copyright lines shown on the top of the first page of the PDF version, or "Copyright © American Society for Microbiology, [insert journal name, volume number, year, page numbers and DOI]" of the HTML version. For technical questions about using Rightslink, please contact Customer Support via phone at (877) 622-5543 (toll free) or (978) 777-9929, or e-mail Rightslink customer care at customercare@copyright.com.

Please note that the ASM is in full **compliance with NIH Policy**.

Licensed content publisher	Elsevier
Licensed content publication	Bioorganic & Medicinal Chemistry
Licensed content title	Isolation of antiplasmodial anthraquinones from <i>Kniphofia ensifolia</i> , and synthesis and structure-activity relationships of related compounds
Licensed content author	Yumin Dai, Liva Harinantenaina, Jessica D. Bowman, Isabel Osorio Da Fonseca, Peggy J. Brodie, Michael Goetz, Maria B. Cassera, David G.I. Kingston
Licensed content date	1 January 2014
Licensed content volume number	22
Licensed content issue number	1
Number of pages	8
Type of Use	reuse in a thesis/dissertation
Portion	full article
Format	both print and electronic
Are you the author of this Elsevier article?	Yes
Will you be translating?	No
Title of your thesis/dissertation	Investigating the role of the apicoplast in plasmodium falciparum gametocyte stages
Expected completion date	May 2014
Estimated size (number of pages)	241
Elsevier VAT number	GB 494 6272 12
Permissions price	0.00 USD
VAT/Local Sales Tax	0.00 USD / 0.00 GBP
Total	0.00 USD

[LOGOUT](#)**PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE**

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats, and translations.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions). For any other uses, please submit a new request.
