May 7, 2014

Blacksburg, VA

Keywords: denitrifying bioreactor, nitrous oxide, biochar, static headspace
analysis, gaseous standard addition method

Verbal permission to reproduce the article published in the Journal of Environmental Quality comprising Chapter 2 granted by JEQ technical editor Scott Bradford.

My article is published on the JEQ website under the first look category (available at <https://www.agronomy.org/publications/jeq/view/first-look/q14-03-0111.pdf>). Consequently, it is neither under review, allowing me to retain the copyright, or published in the current issue of JEQ, allowing me to submit the standard permission form to reproduce the article in my thesis.

The technical editor at JEQ, Scott Bradform, with whom I spoke on the phone on May 29, 2014, assured me that if I were able to submit the form I would be given permission and granted me verbal permission to use the article in my thesis.

Please find included permission to include our published journal article in my thesis from each of my six coauthors:

Emily Lassiter emilyml@vt.edu May 14 (13 days ago)

to Zach, Brady, Nick, Mark, Brian, Mark

Hi Everyone,

I found out today that I am required by the graduate school to have your permission to submit our article as part of my thesis. If you could please express your permission via email (this informal acknowledgement is acceptable to the grad school), I will be able to submit the emails with my thesis. Other than this step, I am ready to submit, so I would appreciate your response as soon as convent. Thanks!

to me

Hi Emily,

You have my permission!

Thanks,

2. Nick Smith May 14 (13 days ago)

to me

All good with me.

Sent from my HTC EVO 4G LTE exclusively from Sprint

3. Reiter, Mark May 14 (13 days ago)

to rmark7, me, Zachary, Brady, Nick, Brian

You have my permission to publish as necessary.

Thanks,

Mark Reiter

Sent from my Verizon Wireless 4G LTE Smartphone

4. Mark Rogers May 14 (13 days ago)

to me, Zach, Brady, Nick, Mark, Brian

Hey Emily,

You have my permission.

Mark
