

# **Transdisciplinary Strategies to Study the Mechanisms of CD4+ T cell Differentiation and Heterogeneity**

Adria Carbo Barrios

Dissertation submitted to the Faculty of the  
Virginia Polytechnic Institute and State University in  
partial fulfillment of the requirements for the degree of

Doctor of Philosophy  
in  
Genetics, Bioinformatics, and Computational Biology

Josep Bassaganya-Riera, Chair  
Raquel Hontecillas-Magarzo  
David R. Bevan  
Stefan Hoops

June 16<sup>th</sup>, 2014  
Blacksburg, Virginia

Keywords:  
CD4+ T cell differentiation, computational immunology, immunoinformatics

## Copyright and license Policies

### PLOS One

From: <http://www.plosone.org/static/policies.action#copyright>

**“Open access agreement.** Upon submission of an article, its authors are asked to indicate their agreement to abide by an open access Creative Commons Attribution (CC BY) license. Under the terms of this license, authors retain ownership of the copyright of their articles. However, the license permits any user to download, print out, extract, reuse, archive, and distribute the article, so long as appropriate credit is given to the authors and source of the work. The license ensures that the authors' article will be available as widely as possible and that the article can be included in any scientific archive.”

### PLOS Computational Biology
