

Agroforestry and Sustainable Vegetable Production in Southeast Asian Watersheds

NLU kick-off workshop (May 12, 2005)

Baseline studies (Planning)

*Dang Thanh Ha
NLU Team*

Objective:

Provide a socio-economic data as a basis for the design of VIDIN development/experiments and socio-economic impact assessment of integrated vegetable-agroforestry system

Activities

Baseline studies

June-Sep, 2006

Year 2

Develop a survey instrument for the baseline survey

+

Conduct baseline survey

+

Develop data base

+

Data analysis

Report writing

+

Develop a survey instrument for the baseline survey

Working with TMPEGS theme coordinator to develop survey instrument

Common survey instrument (English) adopted/revised for Vietnam

Translate English survey questionnaire into Vietnamese

Pre-testing and finalizing survey questionnaire

A final survey questionnaire ready to use for the base line survey in Vietnam.

Conduct baseline survey

Data collected: farm and farm household characteristics, gender roles, household income and consumption, labor availability, cropping system, production and marketing data, and other socio-economic data.

Develop data base

Data checking

Data coding, input
data into computer

A data base containing data on farm and farm household characteristics, gender roles, household income and consumption, labor availability, cropping system, production and marketing data, and other socio-economic data collected from the base line survey.

Data analysis

Report writing

A Report from the
📌 baseline studies
