

# Agroforestry and Sustainable Vegetable Production in Southeast Asian Watersheds

NLU kick-off workshop (May 12, 2005)

## Objective 3: Policy

(RESEARCH FRAMEWORK)

*Pham Trong Thinh*

*NLU team*

# Policy

Year 1

• **Desk-based Review** ⊕

Year 2,3

• **Stakeholder analysis** ⊕

• **Data analysis** ⊕

Year 4

• **Policy recommendations** ⊕

*To understand the policy and institutional context of VAF systems at various levels (national, regional and local)*

## **Desk-based Review**

Review of sector policies (directly and indirectly affect the financial, technical, and social viability of VAF technologies)

Analysis to identify policy incentives and disincentives in adopting VAF systems/technologies

## Stakeholder analysis

Key informants interview

Focus group discussions

Process documentation/ Participant - observation

Stakeholders' Dialogue

## Data analysis

Identify existing disincentives, constraints to the adoption of proposed VAF conservation technologies by SSFWM.

Identify options for strengthening policy, institutions to promote the adoption and sustainability of VAF systems by SSFWM.

## Policy recommendations

Writing report and making policy recommendations

Presenting policy recommendations in the workshop for comments/feedback from local, regional, national stakeholders

Produce policy brief

*Recommendations on options for strengthening policy and institutional framework that promote the adoption of vegetable-agroforestry (VAF) system, and rewards environmental services.*
