

**Synthesis and Properties of Novel Triptycene-Containing
Segmented Polyurethanes and Semicrystalline Polysulfone-
Polyester Multiblock Copolymers**

Zhengmian Chang

Dissertation submitted to the Faculty of Virginia Polytechnic Institute and State
University in partial fulfillment of the requirements for the degree of

Doctor of Philosophy

In

Chemistry

S. Richard Turner, Chair

Harry W. Gibson

Robert B. Moore

Charles E. Frazier

March 19th, 2015

Blacksburg, VA

Keywords: segmented polyurethanes, triptycene, poly(arylene ether sulfone),
structure-morphology-property relationship

PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats, and translations.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions). For any other uses, please submit a new request.

If credit is given to another source for the material you requested, permission must be obtained from that source.
