Sat, Sep 10, 2016 at 4:13 PM

Hi Thomas,

Hope all is going well.

I was hoping to use some of the Solar House work you did in the past as part of my dissertation. Below is some legalese, but it simply allows me to have permission to use your work in the dissertation and its derivative, but not to use it all over the place for any reason. Your work is necessary to prove the validation of the framework.

Just send me an email back saying you do or do not give permission. Here is the text:

This letter will confirm our previous conversation. I am completing a doctoral dissertation at Virginia Tech entitled "Decision Support Framework: Vegetated Assemblies in Relation to Color Theory." I would like your permission to reprint in my dissertation excerpts from the following:

The excerpts to be reproduced are the work performed in the 5th year studio project about the Solar Decathlon house study in relation to my dissertation including the future study exercise, given to me by you previously via either the cd or paper copy.

The requested permission extends to any future revisions and editions of my dissertation, including non-exclusive world rights in all languages, and to the prospective publication of my dissertation by UMI Company. These rights will in no way restrict republication of the material in any other form by you or by others authorized by you. Your signing of this letter will also confirm that you own [or your company owns] the copyright to the above-described material.

Thanks,
Ken

Hey Ken,

I am doing well, I hope you are too! I apologize for not responding to your previous message, I don't check this email account as often as I should.

I give you permission to use my work as described in your email. Would you also like for me to fill out and send you the form you attached in the previous email? If so, I can fill it out and send it to you tomorrow morning.

Thomas

I have heard that an email is sufficient, but go ahead and do the attachment if you can. It cannot hurt and you can keep a record for yourself.

Thanks again for the permission. The other day I learned we have funding for the deck and arcade so if might actually get built too.

Good luck,
Ken

Joe,

Is it alright to also use the work you did for the green roof delphi exercise in EBS the one time I lectured last year too?

Thanks,

Ken

Hi, Ken,

Of course, you have my permission to use my work.

I just saw the previous email that you sent me.

I could not open the link because I am no longer a student at Virginia Tech.

Would a written agreement via email be enough, or should I print out this email and send you a scanned copy with my signature?

Hope all is well,

Thanks,

Seihyun

To: Sei Hyun Pyo <samarch@vt.edu>

Hi Seihyun,

I have learned that permission via email like this is fine. You would not need to sign it.

Thank you for this and I hope all is well.

Ken
