

**Performance of Acid-Gas Anaerobic Digestion for Minimization of
Siloxane and Hydrogen Sulfide Produced in Biogas for Energy Recovery**

Evan Christopher Bowles

Thesis submitted to the faculty of the Virginia Polytechnic Institute and State University in
partial fulfillment of the requirements for the degree of

Master of Science
In
Environmental Engineering

John T. Novak, Chair
Charles B. Bott
Amy Pruden-Bagchi

February 3, 2012
Blacksburg, Virginia

Keywords: multi-stage anaerobic digestion, multi-phase anaerobic digestion, acid gas anaerobic digestion, siloxane, hydrogen sulfide, sludge, biosolids

Draft 09/01/2009

Based on the information you provided:

Factor 1

Your consideration of the purpose and character of your use of the copyright work weighs: *in favor of fair use*

Factor 2

Your consideration of the nature of the copyrighted work you used weighs: *in favor of fair use*

Factor 3

Your consideration of the amount and substantiality of your use of the copyrighted work weighs: *in favor of fair use*

Factor 4

Your consideration of the effect or potential effect on the market after your use of the copyrighted work weighs: *in favor of fair use*

Based on the information you provided, your use of the copyrighted work weighs: *in favor of fair use*
