

Tube centrifugation for processing platelet-rich plasma in the horse

Robin L. Fontenot

Thesis submitted to the faculty of the Virginia Polytechnic Institute and State University in
partial fulfillment of the requirements for the degree of

Master of Science
In
Biomedical and Veterinary Sciences

Linda A. Dahlgren, Chair

Carolyn A. Sink

Nicole M. Weinstein

April 18, 2012

Blacksburg, VA

Keywords: platelet-rich plasma, platelet concentrate

Hello Robin,

Our policy is such that we allow students to use articles in a thesis on the condition that the correct attribution is given, either that it has been previously published or has been accepted for publication in The CVJ or CJVR and that it appears in the thesis with the kind permission of the Canadian Veterinary Medical Association.

Good luck,

Heather Broughton

Subject: Permission to reprint manuscript in thesis

Dear Ms. Broughton, my name is Robin Fontenot. I am a Masters student/Large animal surgery resident at the Virginia-Maryland Regional College of Veterinary Medicine (Virginia Tech, Blacksburg, VA). I am in my last year of residency and am currently preparing for my Master's defense. My Master's project examined different aspects of processing platelet-rich plasma in the horse. The manuscript resulting from that project, entitled "Simple tube centrifugation for processing platelet-rich plasma in the horse", was accepted for publication in January by the Canadian Veterinary Journal (Manuscript number 2011-0261.R2). I would like to request permission to include this manuscript as a chapter in my electronic thesis. Please let me know if you have any additional questions or concerns. Thank you in advance for your time and assistance.

Respectfully,

Robin Fontenot

Yes, you can use the image for your thesis.

Regards,

Kim James

Subject: Permission to use image

Hello, my name is Robin Fontenot, and I am a large animal surgery resident at the Virginia-Maryland Regional College of Veterinary Medicine (Virginia Tech, Blacksburg, VA). I am currently completing a master's thesis on processing platelet-rich plasma in the horse. I would like to request permission to include the image below in my thesis. This image is very helpful in explaining how your product works and illustrates the differences between manual and automated methods of PRP preparation. I would be more than happy to answer any questions or address any concerns that you might have. Thank you in advance for your time.

Respectfully,
Robin Fontenot
