

On a Bimodal Distribution of Grain Size in Mechanically Alloyed
Bulk Tungsten Heavy Alloys

Andrew Zeagler

Dissertation submitted to the faculty of the Virginia Polytechnic Institute and State
University in partial fulfillment of the requirements for the degree of

Doctor of Philosophy
in
Materials Science and Engineering

subject WG: Permission request
Dear Andrew,

Permission is given to use the figure requested in the way you describe below.
Please make sure that the original copyright source will be acknowledged accordingly.

Thank you.

Kind regards,

Alice Essenpreis
Springer-Verlag Heidelberg

Subject: Fwd: Permission request

It turns out my dissertation will eventually be available in electronic form to everyone, and not just limited to the Virginia Tech community, either on acceptance or after a one-year period.
May the license below be extended to cover this situation?

Thank you,

Andrew

Dear Mr. Zeagler,

Thank you for your e-mail.

With reference to your request to reprint in your thesis material on which Springer Science and Business Media control the copyright, permission is granted, free of charge, for the use indicated in your enquiry. Licenses are for one-time use only with a maximum distribution equal to the number that you identified in the licensing process.

This License includes use in an electronic form, provided it is password protected or on the university's intranet, destined to microfilming by UMI and University repository. For any other electronic use, please contact Springer at (permissions.heidelberg@springer.com)

The material can only be used for the purpose of defending your thesis, and with a maximum of 100 extra copies in paper.

Although Springer holds copyright to the material and is entitled to negotiate on rights, this license is only valid, provided permission is also obtained from the (co) author (address is given with the chapter) and provided it concerns original material which does not carry references to other sources (if material in question appears with credit to another source, authorization from that source is required as well). Permission free of charge on this occasion does not prejudice any rights we might have to charge for reproduction of our copyrighted material in the future.

Springer Science + Business Media reserves all rights not specifically granted in the combination of (i) the license details provided by you and accepted in the course of this licensing transaction, (ii) these terms and conditions and (iii) CCC's Billing and Payment terms and conditions.

Please include the following copyright citation referencing the publication in which the material was originally published. Where wording is within brackets, please include verbatim.

"With kind permission from Springer Science+Business Media: <book title, chapter title, volume, year of publication, page, name(s) of author(s), figure number(s), and any original (first) copyright notice displayed with material>."

This license is personal to you and may not be sublicensed, assigned, or transferred by you to any other person without Springer Science + Business Media's written permission.

With kind regards,

—

Alice Essenpreis

Betreff: Permission request

Hello,

I'm seeking permission reprint a figure in my PhD dissertation. I'm not sure what information you need from me, so I'll provide everything that another organization required in my last permission-seeking adventure:

Requesting the use of the following figure for the purpose of illustrating the distribution of force when a kinetic energy penetrator impacts a target:

ISBN: 3-540-12634-1

Author: Mescall, J.

Title: Materials issues in computer simulations of penetration mechanics

Figure: 4b

Page: 52

Book title: Army Research Office Workshop on Computational Aspects of Penetration Mechanics

Editors: J. Chandra and J.E. Flaherty

Year: 1982

This will be used in the dissertation for my Doctor of Philosophy degree. The thesis will be published by Virginia Polytechnic Institute & State University. The tentative title is "On a Bimodal Distribution of Grain Size in Mechanically Alloyed Bulk Tungsten Heavy Alloys." I'm

expecting 150 pages; only a handful of copies will be printed (not for sale), and the thesis will be available online to members of the Virginia Tech community. The thesis will likely be published in June, and will appeal to those with an interest in tungsten heavy alloys and mechanical alloying.

Customer information:
