

Creation and Characterization of Several Polymer/Conductive Element Composite Scaffolds for Skeletal Muscle Tissue Engineering

Kristin McKeon Fischer

Dissertation submitted to the faculty of the Virginia Polytechnic Institute and State University in
partial fulfillment of the requirements for the degree of

Doctor of Philosophy
In
Biomedical Engineering

Joseph W. Freeman, Chair
Timothy E. Long
John H. Rossmeisl
M. Nichole Rylander
Abby R. Whittington

February 17, 2012
Blacksburg, VA

Keywords: Skeletal Muscle, Scaffolds, Conductive, Actuation, Biocompatibility

Copyright 2012

For chapters 2, 3, 4, and 5, I have retained copyright permission as an author to reprint the article within my dissertation. Chapters 7 and 8 have not been accepted or submitted to a journal yet.

For figure 5 in chapter 1 by De Deyne, no copyright permission is needed as it is to be reused in a dissertation.

PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions).
