

Submissions to JCMCC can be sent to any member of the editorial board, or to the Production Manager.

It is understood that the contents of the paper **have not been published elsewhere, and will not be published elsewhere**. The author should retain a copy of the paper. The Editorial Board cannot accept responsibility for the return of submissions.

Authors are requested to use a **spelling checker** and **grammar checker** before submitting a paper, as it is not the referee's job to check spelling and grammar.

In preparing the manuscript, avoid compositors' conventions, such as coloured underlining. Text need merely be typed in Roman letters, according to the standards of the AMS. Tables and figures should be numbered and in a form suitable for photographic reproduction. References should be given in the form [1] to a final alphabetically organized list of references, which should include page numbers. Authors' names should not be inverted in the reference list; write C.T. Onions, not Onions, C.T.

Once a paper has been accepted, send a .pdf file to the Production Manager. The file must be in 10 point Times or Computer Modern font, single spaced, with the text being 4.5 by 7.125 inches (11.4 by 18.1 cm). We use your copy as camera-ready. An invoice for 25 reprints (with or without covers) will be sent to you if you ask for the reprints.

Open Access Policy, Arxiv: Two years after the date of publication, a paper may be posted in a repository, or personal web site. Papers that are posted to Arxiv may be submitted to JCMCC. However, once a paper has received acceptance, either conditional or final, no updates may be posted to Arxiv.

JCMCC has published a special volume in honour of Professor Ralph Stanton.
It is volume 80, February (2012).

[Tables of Contents](#) are available for recent volumes.

Priority Publication Page Charges

Authors (in order): Ricky X. F. Chen, Christian M. Reidys

Name of Journal: SIAM J. Discrete Math

Manuscript number: M102364R

1. Author's Warranty

By signing this Consent, the Author warrants all of the following: The Work has not been published before in any form except as a preprint, unless explicitly noted as a footnote to the title. The Work is not being concurrently submitted to and is not under consideration by another publisher. The persons listed above as authors are listed in the proper order, no author entitled to credit has been omitted, and there are no other unnamed authors. The Author has the right to make the grants made to the Publisher complete and unencumbered. The Author also warrants that the Work does not libel anyone, violate anyone's privacy or publicity rights, infringe anyone's copyright, trademark, trade secrets, or otherwise violate anyone's statutory or common law rights.

2. Author's Rights

- A1. The Author may reproduce and distribute the Work (including derivative works) in connection with the Author's teaching, technical collaborations, conference presentations, lectures, or other scholarly works and professional activities as well as to the extent the fair use provisions of the U.S. Copyright Act permit. If the copyright is granted to the Publisher, then the proper notice of the Publisher's copyright should be provided.
- A2. The Author may post the final draft of the Work, as it exists immediately prior to editing and production by the Publisher, on noncommercial pre-print servers like arXiv.org.
- A3. The Author may post the final published version of the Work on the Author's personal web site and on the web server of the Author's institution, provided that proper notice of

Remarks:

The paper published on SIAM is: “Plane permutations and applications to a result of Zagier–Stanley and distances of permutations, *SIAM J. Discrete Math.* 30(3) (2016) pp. 1660–1684.”

The paper published on JCMCC is: “On the local genus distribution of graph embeddings, *J. Combin. Math. Combin. Comput.* 101 (2017), pp. 157–173.”

The initial versions of these two papers were posted on arXiv before being sent out for review. And both journals accept papers posted on arXiv prior to publication. So it should be fine to write dissertation based on these papers.
