

**OXFORD UNIVERSITY PRESS LICENSE
TERMS AND CONDITIONS**

Mar 12, 2016

This is a License Agreement between Brantley Hall ("You") and Oxford University Press ("Oxford University Press") provided by Copyright Clearance Center ("CCC"). The license consists of your order details, the terms and conditions provided by Oxford University Press, and the payment terms and conditions.

All payments must be made in full to CCC. For payment instructions, please see information listed at the bottom of this form.

License Number	3785950293744
License date	Jan 11, 2016
Licensed content publisher	Oxford University Press
Licensed content publication	Genome Biology and Evolution
Licensed content title	Insights into the Preservation of the Homomorphic Sex-Determining Chromosome of <i>Aedes aegypti</i> from the Discovery of a Male-Biased Gene Tightly Linked to the M-Locus:
Licensed content author	Andrew Brantley Hall, Vladimir A. Timoshevskiy, Maria V. Sharakhova, Xiaofang Jiang, Sanjay Basu, Michelle A.E. Anderson, Wanqi Hu, Igor V. Sharakhov, Zach N. Adelman, Zhijian Tu
Licensed content date	01/01/2014
Type of Use	Thesis/Dissertation
Institution name	None
Title of your work	Identification and characterization of Y chromosome and M locus genes in <i>Anopheles</i> and <i>Aedes</i> mosquitoes using the chromosome quotient method
Publisher of your work	n/a
Expected publication date	May 2016
Permissions cost	0.00 USD
Value added tax	0.00 USD
Total	0.00 USD
Total	0.00 USD

Terms and Conditions

**STANDARD TERMS AND CONDITIONS FOR REPRODUCTION OF MATERIAL
FROM AN OXFORD UNIVERSITY PRESS JOURNAL**

1. Use of the material is restricted to the type of use specified in your order details.
2. This permission covers the use of the material in the English language in the following territory: world. If you have requested additional permission to translate this material, the terms and conditions of this reuse will be set out in clause 12.
3. This permission is limited to the particular use authorized in (1) above and does not allow you to sanction its use elsewhere in any other format other than specified above, nor does it

apply to quotations, images, artistic works etc that have been reproduced from other sources which may be part of the material to be used.

4. No alteration, omission or addition is made to the material without our written consent. Permission must be re-cleared with Oxford University Press if/when you decide to reprint.

5. The following credit line appears wherever the material is used: author, title, journal, year, volume, issue number, pagination, by permission of Oxford University Press or the sponsoring society if the journal is a society journal. Where a journal is being published on behalf of a learned society, the details of that society must be included in the credit line.

6. For the reproduction of a full article from an Oxford University Press journal for whatever purpose, the corresponding author of the material concerned should be informed of the proposed use. Contact details for the corresponding authors of all Oxford University Press journal contact can be found alongside either the abstract or full text of the article concerned, accessible from www.oxfordjournals.org Should there be a problem clearing these rights, please contact journals.permissions@oup.com

7. If the credit line or acknowledgement in our publication indicates that any of the figures, images or photos was reproduced, drawn or modified from an earlier source it will be necessary for you to clear this permission with the original publisher as well. If this permission has not been obtained, please note that this material cannot be included in your publication/photocopies.

8. While you may exercise the rights licensed immediately upon issuance of the license at the end of the licensing process for the transaction, provided that you have disclosed complete and accurate details of your proposed use, no license is finally effective unless and until full payment is received from you (either by Oxford University Press or by Copyright Clearance Center (CCC)) as provided in CCC's Billing and Payment terms and conditions. If full payment is not received on a timely basis, then any license preliminarily granted shall be deemed automatically revoked and shall be void as if never granted. Further, in the event that you breach any of these terms and conditions or any of CCC's Billing and Payment terms and conditions, the license is automatically revoked and shall be void as if never granted. Use of materials as described in a revoked license, as well as any use of the materials beyond the scope of an unrevoked license, may constitute copyright infringement and Oxford University Press reserves the right to take any and all action to protect its copyright in the materials.

9. This license is personal to you and may not be sublicensed, assigned or transferred by you to any other person without Oxford University Press's written permission.

10. Oxford University Press reserves all rights not specifically granted in the combination of (i) the license details provided by you and accepted in the course of this licensing transaction, (ii) these terms and conditions and (iii) CCC's Billing and Payment terms and conditions.

11. You hereby indemnify and agree to hold harmless Oxford University Press and CCC, and their respective officers, directors, employs and agents, from and against any and all claims arising out of your use of the licensed material other than as specifically authorized pursuant to this license.

12. Other Terms and Conditions:

AAAS Author License to Publish Policy

OUR PHILOSOPHY

The American Association for the Advancement of Science (AAAS), the non-profit publisher of the *Science* family of journals, recognizes the importance of openness in research as well as the increasingly global nature of the scientific enterprise. The broad public communication of peer-reviewed research, and information-sharing within the scientific community, are essential to advancing science in the service of society.

This is why AAAS makes all of its peer-reviewed research content freely available with registration via the *Science* Web site twelve months after publication. AAAS also makes any articles of urgent public-health importance freely and immediately available to the public, and it participates in various efforts to provide no-cost research content to the world's poorest countries.

As part of our mission, AAAS seeks to enhance communication among scientists, engineers, and the public, worldwide. Toward that end, AAAS does not require a copyright transfer from authors. Instead, authors are asked to grant AAAS an exclusive license to publish their work.

FURTHER DISSEMINATION

Authors are encouraged to further disseminate the accepted version of their manuscript, for release on the following schedule:

- Immediately following publication of the work by AAAS:
 - To the author's personal website
 - To the author's institution's archival database
- Six months following publication of the work by AAAS:
 - To the funder's designated repository, if any

Additionally, authors and their institutions are encouraged—without further permission from AAAS—to use the final, published version of their work for educational purposes such as presentations, class handouts, dissertations, or photocopies for colleagues, so long as that use is not commercial in nature.

Further details about the AAAS author license to publish agreement appear below.

OUR LICENSE TO PUBLISH

1. **It's a license to publish, not a copyright transfer agreement.**

AAAS does not require copyright transfer from the authors of editorial content, including research reports, brevia, reviews, policy forums, perspectives, essays, and technical comments. AAAS requires instead a License to Publish, as described here. Ownership of the copyright will remain with the author. AAAS will be the title holder for purposes of registration.

Published by the American Association for the Advancement of Science

2. **Authors grant to AAAS an exclusive license to publish.**

In consideration of publication by AAAS in one of its *Science* journals, the author grants to AAAS an exclusive license to publish and to reproduce, adapt, and distribute the work as well as related supplemental content as broadly as possible, in various languages and forms, worldwide.

3. **Authors can immediately use final works for non-profit purposes—no permission needed.**

The author retains the non-exclusive right to use the final, published version of the work, immediately after it is made public by AAAS and without further permission, for educational and other non-commercial purposes. Such purposes include, for example, print collections of the author's own writings; completion of the author's thesis or dissertation; oral presentations by the author; educational courses taught by the author or offered by the author's institution; and distribution of photocopies by the author to colleagues for non-commercial purposes (not for further re-distribution). Figures from the final, published version of the work also can be used, with attribution, in future works by the author, including journal articles, book chapters, presentation slides, and posters, for example.

4. **Authors also can hyperlink to the final work through the AAAS “referrer linking service.”**

Authors have the right to take advantage of the AAAS referrer linking service in order to provide free access to their final, published work via their personal or institutional Web site. AAAS will provide authors with one free referrer link per article. Information on the service will be e-mailed to the corresponding author the week following publication by AAAS.

5. **Authors can immediately post the accepted work to their personal or institutional archive.**

Authors also retain the right and are encouraged to post the accepted version of their manuscript to their personal Web site or institutional repository, immediately following publication by AAAS. (The accepted version is the paper that was accepted for publication by AAAS, including changes resulting from peer review, but prior to AAAS copyediting.) In such cases, authors must include a hyperlink to the final version published on the *Science* Web site, along with an explanatory note that includes the full citation, as follows: “This is the author's version of the work. It is posted here by permission of the AAAS for personal use, not for redistribution. The definitive version was published in [*Science* Journal Title] on [Volume number and date], DOI: [insert DOI number].”

6. **Authors and their institutions can use the accepted work for non-profit research purposes.**

Information-sharing is a key to scientific progress. Authors and their institutions therefore can use the accepted version of manuscripts for non-commercial research purposes, including sharing results with colleagues, or for replication or adaptation of the work so long as such use is not for any commercial advantage or exploitation. No further permission is needed from AAAS. Authors and their institutions cannot license the work, except to AAAS.

7. **Authors can release the accepted work to designated repositories, as required by funders.**

Authors of research articles, reports, brevia, reviews, or technical comments can release the accepted version of their work to PubMedCentral or another designated repository no sooner than six months after publication by AAAS. The accepted work can be *submitted* to the funder's repository immediately upon publication by AAAS, but authors must ensure that it is not scheduled for posting or public release for at least six months.

8. Authors pledge that the work is original, true, and not previously published.

The author(s) warrant that the work is original, that all facts are true and accurate, that it has not been published elsewhere, and does not infringe on any copyright, proprietary, or personal right of any third party. If the work contains materials owned or controlled by a third party, the author must certify that s/he has obtained permission for its use by attaching documentation to the License to Publish form and by clearly attributing the source within the text of the manuscript.

9. University or institutional restrictions require a waiver.

If university or other institutional restrictions might limit the authors' ability to grant to AAAS any of the rights described in AAAS's license, they must obtain an approved waiver from their institution.

10. Publication by AAAS will require a signed copy of AAAS's License to Publish form.

This License to Publish must be signed and returned to AAAS before a manuscript can be accepted for publication. Each author must sign the form. If the contribution is owned by the author's employer, an authorized representative must sign the form.

11. Authors must sign AAAS's form even if the Work was created under U.S. Government Contract.

The AAAS recognizes the U.S. Government's non-exclusive rights to use the work for non-commercial, governmental purposes where such rights are established in the grant or contract.

12. Authors employed by the U.S. Government should sign in the appropriate section of AAAS's form.

The area designated for U.S. Government employees confirms that the Work was written as part of your official duties as an employee of the U.S. Government, and therefore the Work is in the public domain.
