

Development of Transition Metal-Catalyzed Borylation Protocols using Symmetrical and Unsymmetrical Diboron Reagents

Cheryl Lynne Peck

Dissertation submitted to the faculty of Virginia Polytechnic Institute and State
University in partial fulfillment of the requirements for the degree of

**Doctor of Philosophy
In
Chemistry**

Webster L. Santos, Committee Chair
David G. I. Kingston
Richard D. Gandour
Jatinder S. Josan

August 31, 2017
Blacksburg, VA

Keywords: borylation, transition metal-catalyzed, conjugate addition, alkynes, diboron reagents

Special Terms: The special terms provided by the publisher can be found at the end of the Publisher's Terms and Conditions.

No royalties will be charged for this reuse request although you are required to obtain a license and comply with the license terms and conditions. To obtain the license, click the Accept button below.

Licensed Content Publisher	Thieme
Licensed Content Publication	Synthesis
Licensed Content Title	Copper(II)-Catalyzed β -Borylation of Acetylenic Esters in Water
Licensed Content Author	Cheryl L. Peck, Joseph A. Calderone, Webster L. Santos
Licensed Content Date	Jan 1, 2015
Licensed Content Volume	47
Licensed Content Issue	15
Type of Use	Dissertation/Thesis
Requestor type	author of the original Thieme publication
Format	print and electronic
Portion	full article/document
Will you be translating?	no
Distribution quantity	4
Specified additional information	Intend to use full article in dissertation
Order reference number	
Title of your dissertation / thesis	Development of Transition Metal-Catalyzed Borylation Protocols using Symmetrical and Unsymmetrical Diboron Reagents
Expected completion date	Aug 2017
Estimated size (number of pages)	290
Requestor Location	Cheryl Peck 403 Buckingham Place BLACKSBURG, VA 24060 United States Attn: Cheryl Peck
Publisher Tax ID	DE 147638607
Total	0.00 USD

I agree to these [terms and conditions](#).

Permission for this particular request is granted for print and electronic formats, and translations, at no charge. Figures and tables may be modified. Appropriate credit should be given. Please print this page for your records and provide a copy to your publisher. Requests for up to 4 figures require only this record. Five or more figures will generate a printout of additional terms and conditions. Appropriate credit should read: "Reprinted with permission from {COMPLETE REFERENCE CITATION}. Copyright {YEAR} American Chemical Society." Insert appropriate information in place of the capitalized words.

PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats, and translations.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions). For any other uses, please submit a new request.
