Welcome

Our Mission

The Center for Leadership in Global Sustainability, CLiGS, is here to help sustainability professionals and students learn about their values and biases that impact their work as facilitators. CLiGS strives to instill self-awareness and acceptance in our future leaders. To accomplish this, leaders must understand their own preferences for alternative futures and navigate the assumptions and beliefs of others.

Sustainability leaders influence the development of possible futures by helping stakeholders use strategies to influence systems. Leaders must navigate these differences to avoid polarization and inaction that derail the direction, alignment, and commitment required for sustainable development.

Let's get started!

If you are not yet a member, register here. Otherwise, log in and begin your journey by completing the sustainability values survey!
