THE IAWA CELEBRATES 30 YEARS!

Through the vision of Professor Milka Bliznakov, the International Archive of Women in Architecture Center (IAWA) was established in 1985. Traditionally, women have been omitted from the history of architecture and from mainstream publications, resulting in the their roles being undervalued and their contributions unaccredited. To balance the historical record and account for its omissions, the Center teamed with the College of Architecture and Urban Studies and the University Libraries to bring to light the invisible participants in architecture and the related disciplines.

Now after three decades of commitment to this mission, the IAWA Center has created a significant program in celebration of the 30th Anniversary. The IAWA has fostered research and has greatly expanded its reach by broadcasting the mission and goals of this endeavor. As a result, while celebrating accomplishments, the IAWA has alerted the global design community to the urgency of this mission, attracting new collaborators and partners looking to the next 30 years by hosting the 18th International Union of Women Architects Congress (UIFA) as a benchmark event in July 2015. The congress theme Contributing to the Constellation captivates our imagination to advance the IAWA mission in sponsoring unique exchanges of ideas and creative thoughts.

In hosting the 18th UIFA Congress, the IAWA established linkages on a very broad scale with strong support from across the university along with corporate sponsors, the profession, professional organizations, and government offices. This provided an unique opportunity for students, professionals, educators, and industry partners to contribute and gain knowledge of contributions from around the world. A warm expression of gratitude goes out to all who supported this wonderful event.

The five-day congress originated with an opening day in Washington, D.C., travel through Virginia, continuing at Virginia Tech for four days filled with scholarly, professional, and creative activity. The event culminated with a three-day UIFA Post-Congress Tour through West Virginia, Pennsylvania, and Virginia returning to Washington. With more than 90 delegates from 15 countries assembled from North, Central, and South America, Europe, Asia and Africa, the congress initiated correspondence between diverse groups of women, creating a lasting international network.

Donna Dunay, FAIA - Chair, IAWA

Excerpts from the first letter to solicit work for the IAWA, July 9, 1985.

Dear Colleague:

The scope of the archives will be international and will include work from the beginning of woman’s involvement in architecture in any capacity up to the present time...

It may take years to collect the works of women architects around the world, to catalog this material, and to make the archives available to scholars for research. Yet to begin such an undertaking we need the commitment of numerous women architects to help either by sending their work now or by promising to donate their archives later.

Please assist us in collecting a unique International Archive of Women in Architecture. Thank you in advance.

Milka Bliznakov, Ph.D
Professor of Architecture and Urban Design
Excerpts from the first letter to solicit work for the IAWA, July 9, 1985.

To start the IAWA Milka Bliznakov wrote more than 1000 women around the world. Her card file holds the record of first women contacted.
A native of Bulgaria, Bliznakov petitioned Tech to start a special collection of female accomplishments in the field and send 1,000 letters asking women around the world to donate their work.

"The point being, since women are not mentioned in history, perhaps the materials are not available for historians to reflect or write. So a very direct idea—you collect these materials and let history do its work," Dunay said.

Opened in 1985, today the collection is a joint program of Tech's College of Architecture and Urban Studies and the University Libraries...

The 30th anniversary of Bliznakov's project drew the interest of the Paris based UIFA, of which the Tech professor had been a member.

UIFA has held worldwide congresses every two to three years since it was founded by Solange d'Herbez de la Tour in 1963.

Typically, congresses have been held in capital cities such as Tokyo, Capetown, South Africa, Berlin, and Paris, but d'Herbez de la Tour said the 30th anniversary made Blacksburg the perfect place for part of this year's gathering.

The group, which comprises representatives from 15 countries on five continents, began its week-long event in Washington, D.C., and visited the University of Virginia in Charlottesville on Tuesday prior to spending three days at Tech.

On Wednesday they arrived at the IAWA archives, most of them seeing the collection for the first time.

"We all knew it existed, but nobody had seen it, so that's big," said Claire Bonney of Switzerland.

While looking through drawings and photos, they reminisced about the history of women in what is generally considered a male-dominated profession and about Bliznakov, who was a friend and inspiration to many of them.

Diane Elliott Gayer said she first remembered meeting Bliznakov at the UIFA congress in Capetown at the UIFA congress in Capetown, which was held in 1993, prior to Nelson Mandela becoming president.

"So we had long nights of political discussions...she'd be there with her cigarettes and drinking wine until the late hours talking about how women are going to change the world, and how we won't," Gayer said.

Some of the women found their own contributions within the collection, including drafting tools L. Jane Hastings said she was gifted when she graduated from the University of Washington.

"There was a time I would not tell people what I did. I would say, 'Well I draw lines and if I ever told them I was an Architect, they'd think I was lying. They wouldn't believe me," Hastings said. Today her firm, the Hastings Group, is credited with designing more than 500 buildings in the Seattle area.

Despite the widespread cultural shifts since the 1950's, many participants said they felt women were still under-appreciated in the field of architecture and that added to the importance of the archives at Tech.

"It's extremely important I think because it's just recognition within our profession because you don't normally see that," said Laura Battaglia of Virginia Beach.

Horton said she believed the archives also served in an important role in the future female architects.

"It's very important to bring it to the younger generation that women can be architects. When I started to study architecture it was always, "That is not a job for women," Horton said.

Recognition and encouragement are available today largely because one woman asked a question more than three decades ago.

"Look at all these people here...that was Milka's doing," Bonney said.

Susannah C. Drake, FASLA

Susannah C. Drake is the Principal of dlandstudio pllc, an award winning multidisciplinary design firm of landscape architects, urban designers, sculptors, scientists and architects. dlandstudio’s recent public projects include: the Brooklyn Bridge Pop-up Park, a temporary waterfront open space that attracted almost two hundred thousand visitors and the Raising Malawi Academy for Girls, Lilongwe, Africa.

Jane Cady Wright, FAIA

Jane Cady Wright, FAIA, President and CEO of Hanbury is a 1980 graduate of Virginia Tech. Her firm specializes in Campus Planning and Design, the Arts, and Preservation. An active leader in campus planning and design, she has provided expertise on over 60 college campuses. She has been with the firm since 1984, and her firm has worked on many projects at Virginia Tech including the Campus Master Plan.

Kristine K. Fallon, FAIA

Kristine K. Fallon, FAIA, is a pioneer in applying information technology to architecture, engineering, and facility management since the 1970’s. She founded Kristine Fallon Associates, Inc. in 1993 to focus on the use of information technology in the capital facilities industry. Fallon pioneered in the application of Electronic Data Management techniques to coordinate the efforts of large design and construction teams.

Jane Hastings, FAIA

Jane Hastings, FAIA, studied architecture at the University of Washington, the only woman in a class of 200, graduating in 1952. She became the eighth woman to be licensed as an architect in the State of Washington. In 1974, she created the “Hastings Group,” completing over 500 projects in Seattle. She became a Fellow of the AIA in 1980, and the first woman chancellor of the AIA College of Fellows in 1992.

The 30th Anniversary of the IAWA has been transformative. In addition to the activities established since 1985 in pursuit of collections, the past year has brought a focus to celebrating the IAWA’s history, while establishing a new vision for the future. The New Vision harnesses the current digital landscape with the strength and expanse of social networks to broadcast the IAWA mission. Unique in the world as the physical repository for the original works and papers of women, the IAWA invites study to forge history. The Center, therefore, promotes the work of women as an active and enlarging support structure for researchers, historians, and other organizations. Efforts in this anniversary year centered on extending the network in conjunction with organizing the 18th UIFA Congress. Increasing the collections through education, publication/dissemination, and promotion included the development of the 30th Year IAWA Book, 30 x 30 digital exhibit, IAWA Special Collections Open House and Exhibition, For the Future travelling exhibition, the Milka Bliznakov Research Prize Award and The New Visual Archive Portal.
