Subject: RE: Use of Journal of Bridge Engineering Article for Thesis

Dear Becky,

Thank you for your inquiry. We are happy to help. I'm sorry you were having problems with RightsLink.

You have permission to reuse the following figure in your thesis provided the figure in total does not account for more than **25% of the new work**.

- Figure 1 from the *Journal of Bridge Engineering*, Volume 22, Issue 3 (March 2017) "[Evaluation of Transverse Tie Rods in a 50-Year-Old Adjacent Prestressed Concrete Box Beam Bridge](#)" by Eric P. Steinberg and Ali A. Semendary

A full credit line must be added to the material being reprinted. For reuse in non-ASCE publications, add the words "With permission from ASCE" to your source citation. For Intranet posting, add the following additional notice: "This material may be downloaded for personal use only. Any other use requires prior permission of the American Society of Civil Engineers. This material may be found at [URL/link of abstract in the ASCE Library or Civil Engineering Database]."

Each license is unique, covering only the terms and conditions specified in it. Even if you have obtained a license for certain ASCE copyrighted content, you will need to obtain another license if you plan to reuse that content outside the terms of the existing license. For example: If you already have a license to reuse a figure in a journal, you still need a new license to use the same figure in a magazine. You need separate license for each edition.

Sincerely,

Leslie Connelly
Senior Marketing Coordinator
American Society of Civil Engineers

Subject: Use of Journal of Bridge Engineering Article for Thesis

Hello,

My name is Rebecka Gilbertson and I am a structural engineering graduate student at Virginia Tech. I am publishing a thesis this May and I would like to use a figure from an ASCE journal article in my thesis. I have attempted to go through Rightslink for permission but it told me that my request requires a special order.

The information about the figure I would like to use:

Journal of Bridge Engineering, Volume 22, Issue 3 (March 2017) "Evaluation of Transverse Tie Rods in a 50-Year-Old Adjacent Prestressed Concrete Box Beam Bridge" by Eric P. Steinberg and Ali A. Semendary
Fig. 1. Typical section of an adjacent member bridge (only part a, not b)

I will not be altering the figure in any way. Please let me know what other information that you require from me in order to obtain permission to use this figure.

Thank you,

Rebecka Gilbertson

Hi Becky,

You have my permission to use this figure for the stated purpose.

Thanks,
Ezra

Ezra,

I would like to ask permission to use one of your figures in my thesis that is to be published this May. The figure is "Figure 30 Embedded plate prior to placing adjacent beam and welding" from your thesis, "Refinement of the Inverted T-Beam Bridge System for Virginia." The figure is being used to illustrate the surface roughening that was produced for your specimens.

Thank you,

Becky Gilbertson

Objet : Permission to use Poutre Dalle Photograph in Thesis

M. Paul-Antoine Nicolaudie,

My name is Becky Gilbertson and I am a graduate student at Virginia Tech working with Dr. Carin Roberts-Wollmann. Last year, she wrote to you to ask for permission to use a photo on the Matière website of the Poutre Dalle system. I would like to ask for your permission to use the same photo in my thesis which will be published this May. The photo is the third image on the Poutre Dalle page (<https://www.matiere-tp.fr/poutre-dalle/>) and I have attached a copy to this email. The photo will be used as an illustration of the system that was used as an inspiration for the Virginia Inverted T-Beam bridge system.

Please let me know if you need any further information from me.

Thank you,

Becky Gilbertson

Subject: Permission for use of your figure in thesis

Dr. Menkulasi,

My name is Becky Gilbertson and I am a graduate student at Virginia Tech working with Dr. Roberts-Wollmann. My research is a continuation of the Virginia Inverted T-Beam work that you completed while you were here, and so I would like to ask for your permission to use one of your figures in my thesis. The figure is a photo of the roughened surface that you created for your specimens featuring sloped webs, Figure 3.13 (a) from your dissertation titled "The Development of a Composite Concrete Bridge System for Short-to-Medium-Span Bridges." I am using the photo to illustrate the alterations that were made to the system due to your work.

Please let me know if you would like any further information from me.

Thank you,

Becky Gilbertson

Subject: Permission to use a Figure in my Thesis

Ms. Shannon Fiecke,

My name is Becky Gilbertson and I am a graduate student at Virginia Tech who is publishing a thesis this May. I would like to ask permission to use two MnDOT figures in my thesis. Both of the figures are from the same report, "Application of Precast Decks and Other Elements to Bridge Structures," (2006-37). The figures are Figure 3.3 Photograph of the transverse hooks of the precast sections and Figure 3.8 Photograph of the reinforcement cage installed above the precast longitudinal joint. These figures are going to be used to illustrate the work that the University of Minnesota completed that helped lead to the development of the Virginia Inverted T-Beam bridge system.

Please let me know if you need any further information from me.

Thank you,

Becky Gilbertson
