Hello,

I'm currently a PhD student at Virginia Tech and wanted to know how to get permission to use an image published in "Operational Forecasting Using Automated Guidance" by Leonard Snellman, a 1977 BAMS article, vol. 58, no. 10. The image, which I'm attaching a screen capture of here, is on p. 1043 of the article.

I'm doing a historical analysis of the term meteorological cancer and would like to use the image to illustrate the term when it originated.

What procedures or steps should I take to secure permissions for my dissertation?

Thanks so much,
Jen Henderson
